

★ LEWIS & CLARK UNIT SUMMARY ★

The spirit of Daniel Boone continues with Lewis and Clark and the Corps of Discovery as they travel farther west than any other American emissaries. Journaling, making illustrations and writing descriptions of all the unusual sights they saw, was an important part of their role as explorers. Encouraging keen observation, your study of plant and animal life continues with the new and exciting sights found on the trail into the northwest. Equally novel is the study of the states of matter and the water cycle connected to their travels. With real accounts of their adventures, primary source documents make real the adventure, danger, and exhilaration of success experienced by the group, including the exploits of a remarkable Native American woman, Sacagawea. Join the Corps as they travel to points unknown at the behest of their friend and president, Thomas Jefferson.
