

Spill Kit Monitoring and Replenishment Factsheet

Spill kits are crucial for fast and effective cleanup of bodily fluids, helping to maintain a safe and welcoming environment. These boxed kits are fully stocked with everything needed for safe handling, making it easy for staff to quickly grab a kit and manage spills efficiently, reducing potential workplace hazards.

The Problem

- Time-intensive management of expiry dates
- Inadequate overall visibility of statuses and locations across your business
- Manual processes for re-ordering
- Activity that does not make it to the Hazard log and an appreciation of how many clean ups there are and the cumulative risk involved

Business Opportunity

- Receive notifications when a Spill Kit is removed from its holder
- Automate notifications and escalation processes to create an online audit trail
- View Spill Kit status online (via app) for all stakeholders
- Save time by automating equipment monitoring
- Integrate usage data with your H&S system for stream lined reporting

Clever Ecosystem

Save money and time while enjoying peace of mind with our connected first aid ecosystem, featuring monitored cabinets, AEDs, eye wash stations, and mobile or car kits.

HOW TO ORDER

Clever shelf automated reordering system

Spill Kits - Blood and Vomit

Clever Shelf

The Clever Shelf holds 2 Spill Kits. Designed for easy and quick retrieval of a kit in an emergency. The Clever Shelf also monitors the presence of the kits to enable re-ordering.

Connectivity

The Clever Shelf connects seamlessly to the internet through either a Clever First Aid cabinet or a Clever Gateway device.

Installation

- The shelf can be attached to the wall by double sided tape, or screws. The shelf weights 550g, and each kit is 325g. the total fully loaded weight is 1.2kG
- The Clever First Aid App includes an easy setup feature that allows installers to verify that the sensors are functioning correctly.
- Dimensions 380mm x 155mm x 70mm

Monitoring

- Sensors detect when a kit is missing and automatically initiate a replenishment.
- Kit expiration dates are monitored and Clever will automatically send replacement kits if they expire without being used.
- The Clever Shelf must be installed within the line of sight of the Clever First Aid cabinet.
