# INCREASE REVENUE TODAY!

## IMAGINE YOUR POTENTIAL

### HIFU PRICING FOR YOUR CLINIC

Everyone will be different in terms of areas treated, so costs will naturally vary. Some patients want a full face and neck tightening experience, while others may just want facial wrinkles softened or a face boost. The average cost of a treatment is:

Full face: \$1800 to \$2500

Checks: \$1200 to \$1500

Eye area: \$700 to \$1000

Jowels: \$800 to \$1200

Neck: \$1200 to \$1500

You do the maths so if you only treated 2-3 clients a week that is and average of **\$2500-\$3500** for approximately 3-6 hours work depending on the treatment. That will create an average of an **extra \$130- \$180,000 +** in revenue to your clinic per annum!!

There are clinics already doing already upwards of **\$100,000 + a month in HIFU only!!**

## WE'VE GOT YOUR EDUCATION COVERED WHAT WILL YOU DO WITH IT?

Learn and Train with the best in the industry and create the business you have always dreamed of. With HUGE earning potential by delivering quality and consistent procedures time and time again you can build the life and career you have always dreamed of... The central image shows the MEDTECH 4D LIFTING TECHNOLOGY device, a silver and black unit with a large touchscreen display. The screen displays various settings and a grid of red dots. Below the screen are three white applicator heads. To the left of the device is a white handheld applicator. Surrounding the device are ten circular inset images, each showing a specific facial area with a wrinkle or line, and a corresponding text label below it.

- Remove Fine Lines
- Remove Crow's Feet
- Eliminate Forehead Wrinkles
- Remove Lip Lines
- Dilute Bitter Lines
- Anti Neck Profile
- Take Away Nasolabial Folds
- Remove Wrinkle Between Eyebrow

## Treatment result

A grid of 12 pairs of 'Before' and 'After' photographs showing the results of the 4D LIFTING TECHNOLOGY treatment. Each pair consists of two side-by-side images. The 'Before' images show various facial wrinkles and lines, while the 'After' images show the same areas with significantly reduced or eliminated wrinkles. The pairs are arranged in two rows of six.

- Row 1, Column 1: Nasolabial folds.
- Row 1, Column 2: Lip lines.
- Row 1, Column 3: Crow's feet.
- Row 2, Column 1: Forehead wrinkles.
- Row 2, Column 2: Neck profile.
- Row 2, Column 3: Wrinkle between eyebrows.

# MEDTECH 11 LINE 4D HIFU

Includes: 3 cartridges each 10000 shots fo face lifting.

High Intensity Focused Ultrasound(HIFU) directly delivers heat energy to skin and subcutaneous tissue that can stimulate and renew the skin's collagen and thus consequently improving the texture and reducing sagging of the skin. It literally achieves the results of a facelift or a body lift without any invasive surgery or injections, moreover, an added bonus of this procedure is that there is no downtime, and also, it works equally well for people of all skin colors, in contrast to that of lasers and intense pulse lights.

High Intensity Focused Ultrasound (HIFU)is the ultrasonic focusing on target tissue,the use of ultrasonic with tissue penetration and energy deposition,Ultrasonic focusing will occur in organisms in vitriol to adipose tissue(target: the skin dermis layer, basal layer, SMAS layer of fascia),to achieve the purpose of beauty by mechanical effect, thermal effect and cavitation effect of ultrasound

Theory: The instrument is the electric exciting signal generated by the program control of high frequency oscillatory waves into focusing type ultrasonic, by positioning the operating head and mobile effect on target, to achieve the target as the center, outward radiation energy, to tighten the aesthetic effect.
