MULTI-FUNCTIONAL POWER FRAME

PF-226

PF-2210

PF-2210 POWER FRAME FOR PUNCHING BAGS 10M

Size, mm:
9800 x 2012 x 2960

10 meters power frame for bags by GREEN HILL designed for simultaneous martial arts training of several athletes using complexes of exercises. The frame has 9 fastenings for punching bags. Optionally, you can add to the frame:

- Swedish wall
- BOX TOWER
- Speedball platform
- Moveable punching bag system

Boxing bags are not included in the basic package and must be ordered separately.

IMPORTANT

Before ordering, the dimensions of the frame require clarification.

Personalization

By the request of the customer, it is possible to apply a logo on the power frame or a metal plate with the customer's brand logo.

Construction and materials

Steel frame can be 2 or 3 mm.

Special powder paint coating with a rough surface effect, which provides maximum protection of the product from external influences (available in any color by the request of the customer).

Steel support legs with holes for fixing to the floor.

PF-226 POWER FRAME FOR PUNCHING BAGS 6M

Size, mm:
6000 x 2012 x 2960

6 meters power frame for bags by GREEN HILL designed for simultaneous martial arts training of several athletes using complexes of exercises. The frame has 5 fastenings for punching bags. Optionally, you can add to the frame:

- Swedish wall
- BOX TOWER
- Speedball platform

Boxing bags are not included in the basic package and must be ordered separately.

IMPORTANT

Before ordering, the dimensions of the frame require clarification.

Personalization

By the request of the customer, it is possible to apply a logo on the power frame or a metal plate with the customer's brand logo.

Construction and materials

Frames made of steel 40x80, 50x50, 100x50 mm, thickness 3 mm.

Special powder paint coating with a rough surface effect, which provides maximum protection of the product from external influences (available in any color by the request of the customer).

Steel support legs with holes for fixing to the floor.

BR-224 CROSS STAND FOR 4 BOXING BAGS

Size, mm:
2050 x 2050 x 2590

Cross rack for 4 boxing bags, designed for practicing striking techniques by a group of athletes. The stand has wheels for easy movement and special threaded legs to lock the stand in place.

- Rack for 4 bags
- Wheels for ease of movement
- Threaded feet for fixing

Personalization

At the request of the customer, it is possible to apply a logo on the power frame or a metal plate with the customer's brand logo.

Construction and materials

Special powder paint coating with a rough surface effect, which provides maximum protection of the product from external influences (available in any color by the request of the customer).

BR-2221 BOXING PUSH RACK

Size, mm:
1300 x 1280 x 2450

The rack for punching bags, designed for practicing striking techniques by two athletes simultaneously. The stand is fixed with special threaded legs.

- Stand for training of 2 athletes
- Punching bags fastenings
- Speedball platform

Personalization

At the request of the customer, it is possible to apply a logo on the power frame or a metal plate with the customer's brand logo.

Construction and materials

Special powder paint coating with a rough surface effect, which provides maximum protection of the product from external influences (available in any color by the request of the customer).

DOUBLE-SIDED FLOOR STAND FOR MEDICINE BALLS

BR-97828

Rationally arrange space in gyms - is not an easy task. A double-sided floor stand for medicine balls will help you solve it. With its help, you perfectly optimize the storage area for medicine balls (medicine balls, wall balls). The structure can be disassembled for transportation and storage.

Benefits of GREENHILL medicine balls stand:

Stable collapsible construction

At the base of the ball stand there are 4 rubber feet - they increase stability on any floor. If necessary, the design of the rack allows it to be completely disassembled so that it does not take up much space during storage (transportation).

Ease of use

All shelves have a safely rounded design. Each ball is stored on an individual shelf, allowing you to store heavier balls lower and lighter balls higher. Occupying just a small area, you can store as many as 10 medicine balls!

Quality materials

For production, thick-walled pipes with a thickness of at least 3 mm and sheet steel with a thickness of at least 4 mm are used. This is a guarantee of a long-term service.

Powder coating

Each part is coated with electrostatic powder paint and kiln fired. The customer can choose the color of the equipment.

Main characteristics

Brand: GREENHILL
Warranty: 12 months

Type: Gym equipment

Height: 2170 mm

Width: 660 mm

Depth: 840 mm

Weight: 40 kg

Base material: Steel

Color: Black

PLATFORM WITH WOODEN DISC FOR PNEUMATIC BAG

BR-97827

Platforms for pneumatic punching bags allow you to securely fix them for practicing boxing punches. They are ideal for both gym and home use.

Main characteristics

Brand: GREENHILL
Warranty: 12 months

Sport: Box
Height: 600 mm
Width: 600 mm
Depth: 750 mm
Diameter: 600 mm
Thickness: 28 mm
Platform: Pine
Weight: 11 kg
Mounting material: Steel
Installation method: Wall
Color: Black

PUNCHING BAG BRACKET (PUNCHING BAG MOUNT)

BR-97826

Main characteristics

Brand: GREENHILL

Brand: 12 months

Type: Wall Bracket

Length: 465 mm

Width: 230 mm

Height: 410 mm

Weight: 2,4 kg

Base material: Steel

Installation method: Wall

Color: Black

Punching bags bracket - a secure attachment for punching bags of up to 60 kg! The device is resistant to high loads and guarantees you safe training regardless of your level of expertise. Practicality and quality accompanied by simplicity of execution and the absence of unnecessary elements.

Advantages of the GREENHILL punching bag bracket:

- Hardened steel covered with a protective layer of black paint
- The thick walls of the projectile are durable and do not pose a danger to the exercising person
- Powder coating method
- Includes all necessary mounts

BOXING PNEUMATIC UNIT (WITHOUT PNEUMATIC BAG)

BR-97829

Main characteristics

Brand: GREENHILL
Warranty: 12 months

Type: Pneumatic unit
Circle diameter: 600 mm
Circle thickness: 18 mm
Stem: 490 mm
Height: 630 mm
Adjustment in height:
400 mm in 100 mm steps

Mounting width:
160 mm hole centers
Weight: 11 kg
Platform: Laminated chipboard
Base material: Steel
Installation method: Wall
Color: Black

In the kit you will receive a pneumatic unit, screws.

The platform structure is made of durable industrial steel for professional training. The dense platform 2 cm thick and 60 cm in diameter will provide lightning-fast rebound of the pneumatic bag and eliminate any vibration.

Height adjustment of the platform is possible in the range of 40 cm, which makes it convenient for athletes of any height.

The platform can be adjusted very simply - along the guide using a special mechanism, which makes the adjustment quick, simple and convenient.

The design of the platform allows it to be installed in rooms with low ceilings.

LAT PULLDOWN MACHINE (VERTICAL BLOCK) 105KG

BR-225

Designed to work out the broadest muscles of the back, the vertical row block trainer is easy to use. It allows you to perform the exercise in a comfortable sitting position, while providing a wide variability of the load. The unit is equipped with rubberized steel plates with a special reversible pin to select the desired weight. The hips of the practitioner fixed with soft rollers, adjustable in height. The position of the handle (above the athlete's head) provides a comfortable pulldown.

- Height-adjustable rollers securely fix the athlete's hips
- The exercise`s load created using weight blocks
- The stable construction of the machine`s frame makes it possible to train with athletes of any level.
- To eliminate slipping and increase stability, the trainer has rubber pads
- The machine painted with a thermosetting powder paint
- Seat made of 18 mm plywood
- The weight block of the machine consists of 20 metal plates weighing 5 kg each and chrome-plated rails
- The load is changed using a pin lock, a magnet is installed in the handle of the lock
- To propel loads, a 5 mm pvc cable is used with tensile strength of 800 kg with a maximum load of 1000 kg.
- Rotation of units on closed-type rolling bearings
- The simulator is equipped with shock-absorbing pads that do not require anchoring to the floor

Main characteristics

Brand: GREENHILL
Warranty: 12 months

Type: Для зала

Height: 2210 мм

Width: 710 мм

Depth: 1225 мм

Weight: 170 кг

Manufacturing material:

Color: Black

WALL BRACKET FOR BOXING BAGS

BR-97824

Main characteristics

Brand: GREENHILL

Warranty: 12 months

Type: Wall Bracket

Length: 635 mm

Width: 200 mm

Height: 560 mm

Weight: 3 kg

Base material: Steel

Installation method: Wall

Color: Black

Wall mounted. Console design.

Can fold for storage - saves space at home.

The bracket is made of a metal - ensures durability during intense boxing training.

Black color. Powder coating gives a finished look and protects it from external influences.

The bracket recommended by the manufacturer for home and professional training.

PROFESSIONAL PLATFORM FOR PNEUMATIC BAG

BR-97823-1

Brand: GREENHILL
Warranty: 12 months

Main characteristics:

Platform thickness: 120 mm

Platform diameter: 700 mm

Platform material (base): Solid pine

Vibration composition of the platform: Yes

Frame material: Quality carbon steel

Height adjustment range: 300 mm

Lifting mechanism: Screw nut

Wall frame height: 1100 mm

Wall frame width: 400 mm

Wooden platform frame height: 610 mm

Wooden platform frame width: 720 mm

Weight: 110 kg

THE SIMULATOR FOR PRACTICING STRIKES BOXTOWER

BR-97825

The multifunctional boxing trainer, designed for practicing striking techniques for both beginners and professional athletes. Used in sports clubs, gyms, fitness centers.

Trainer construction: thick tube steel frame, steel base, 8 pillows on hardened stiff springs. The height of the pillows is adjustable to suit the height of the athlete. For the convenience of adjusting the height, a gas spring installed. The angular position of the cushions provides maximum comfort when striking from various positions.

The pillows are made of high quality artificial leather. Padding: PPE + PVV combination, excellent absorption of strong impacts.

Main characteristics

Brand: GREENHILL
Warranty: 12 months

Type: Gym equipment
Height adjustable:
from 1550 to 2000 mm

Width: 940 mm

Depth: 770 mm

Weight: 80 kg

Manufacturing material:
Steel

Color: Black

Color: Black

SPORTS TATAMI
FOR YOUR GYM

WIN WITH
GREENHILL

Tatamis are designed for various kinds of performance and training. When it comes to martial arts, specialized floor coverings are especially relevant. This product has a number of advantages in the form of floor protection during training sessions, as well as an element of safety for athletes at the time of performing various exercises.

GREEN HILL is a manufacturer and offers many different flooring options for gyms and tatami mats without intermediaries. Thanks to its special composition, the covering can be easily expanded to different floor areas.

Tatamis are made of a certain material with high wear resistance. The anti-slip coating securely fixes the tatami in one place. The special rigidity of the tatami allows it to spring under load and regain its original shape, which guarantees the safety of athletes during training

ROLL MATS
FOR YOUR GYM

QUALITY IS
GREENHILL

ROLL-MATS

Roll mats are convenient for training in various sports in the same gym. The design allows you to frequently roll them without losing the properties of the working surface. In just a couple of minutes, you can set a roll-mat in the training room.

Roll-mats are convenient for transportation, in case of need to periodically move with them.

You can choose the length of the roll-mat for yourself, depending on your training location. Roll mats are universal in their properties. The thickness of 30-40 mm allows you to practice fitness, gymnastics and aerobics, jujitsu, mixed martial arts and yoga. The 50 mm mat can be used for aikido and judo, classical and Greco-Roman wrestling, sambo and for some types of gymnastics

BOXING
RINGS AIBA

APPROVED
RECOGNIZED

aiba ring

7.8x7.8 m

The size of the platform is 85 cm beyond the ropes on each side, including additional supports;

The ring is 100 cm high from ground or floor level;

The platform was built in accordance with safety requirements, has a flat floor, free of any obstacles. There are four corner posts in the corners of the ring, which are well protected by special pillows or otherwise arranged to prevent boxers from getting injured.

Corner pillows - 4 pcs. (1 piece red, 2 pieces white, 1 piece blue).

Ring platform - a square with dimensions of 7.80 x 7.80 m;

The floor is covered with PVV - mats 1.6 cm thick.

aiba ring

7.8x7.8 m

The non-slip cover is made of canvas and covers the entire platform. Blue covering, Pantone 299;

The ropes are made of thick padding on top of a heavy metal cable, stretched into covers made of high-quality white artificial leather. On each side of the ring, there are four rows of 4 cm thick ropes, excluding the covering. Four ropes are stretched at 40 cm, 70 cm, 100 cm and 130 cm from the non-slip mat. On each side, the ropes are interconnected by two bridges made of dense fabric, 3-4 cm wide, at equal intervals. Two jumpers slide along the rope

The tension of each section of the two upper ropes is tight. The tension on the lower section of the two ropes is not too tight. There is a possibility of tension adjustment.
