

# SENSOR

TS-1

TOUCH SENSOR

The touch sensor is designed for seamless integration into joinery and cabinetry. Featuring a soft blue LED ring for visibility, it offers simple on/off control with a single tap—and smooth dimming with a push-and-hold function, giving you full 0–100% brightness control.

It's a convenient solution when you want to place the switch close to the task area, making it perfect for study desks, workbenches, home offices, or anywhere hands-on control is a must. Clean, practical, and easy to install.

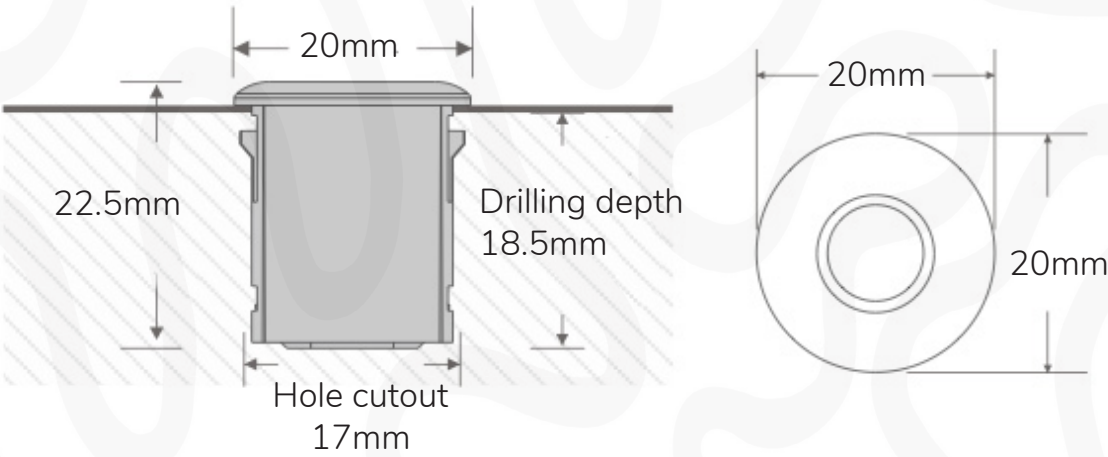

## APPLICATIONS

- Cabinets & Joinery
- Bathroom Vanities
- Kitchen Kick Lighting
- Wardrobes & Closets
- Custom Furniture
- Under-Bench Lighting
- Wine Cabinets
- Display Units
- Bedside Lighting
- Home Bars & Shelving
