Product Description

The 10HP PHP52 is one of the most popular 3 phase compressors on the market. The PHP52 is a three cylinder, two stage, slow revving cast iron compressor capable of 175PSI. Being a two stage pump this compressor will operate at a high pressure without losing any volume of air. This is a tried and trusted machine in

the marketplace with a great reputation for its reliability and performance. As with everything we have used the highest quality componentry and every compressor is manufactured locally with an immaculate attention to detail.

High Density Mats

With all stationary tanks it is essential that you have 8-10mm high density rubber mat under the feet to not void warranty, this is also an OH & S requirement.

This is to allow movement when the machine is in operation. Failing to do so can result in tank leaks/ruptures and will void warranty.

Note: When bolting down do not over tighten.
