Nano Cloaking Technology

Nano cloaking film is a very special and rare window film privacy technology by NHD Film.

By sticking on inner side of the partition glass, outside viewers can hardly see any contents from the screens, while the glass panels still keep transparent see-through.

Nano cloaking film is available for roll size 48/52inch wide and 100feet(30.5m) long.

Maximum size of material could be up to 1.5 meters width and 200 meters long.

Datasheet

Product Name: **Nano Cloaking Film**

Material: **PET + Polyvinyl + Triacetate**

Color: **Clear Grey**

Backing Adhesion: **Acrylic Pressure-sensitive Adhesive(high-tack)**

Total Thickness: **0.3mm (0.17mm exclude release/protective liner)**

Width: **48"/54"/56"/59"**

Length: **100 feet = 30.5 m**

Use: **Architectural Glass Films**

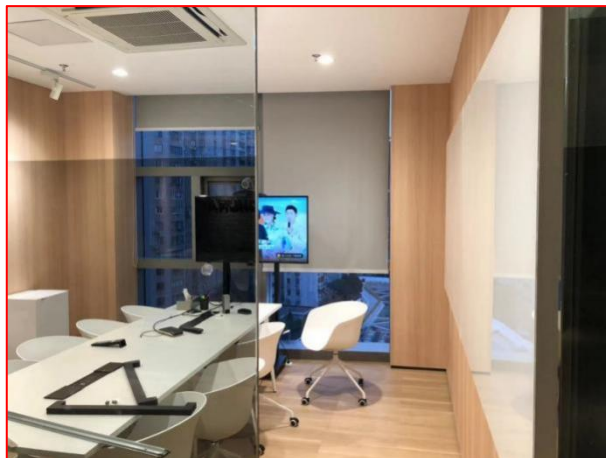

Working: **-5°C to +60°C/90RH**

Storage: **23±2°C, 65±15%RH**
