150mm half round gutters with 80mm round downpipes

Finish/ Colour:

RAL 9005 Matt Black

Location:

North Norfolk

A development of beautiful homes and a luxurious boutique hotel all designed, specified and built to an exceptional standard, on the former site of Langham Glass.

A blend of a technically advanced 21st century home – ‘Eco-Home’ levels of thermal and acoustic insulation and low energy lighting – inside a charming traditional shell and in a great location – a picturesque conservation village in North Norfolk within an area of outstanding natural beauty.

The developers, Avada Langham Limited, have earned a reputation for choosing first class materials and designing properties with the owner in mind. Recent projects include work for HRH The Queen on one of the Royal Estates.

There was a wide variation of designs over the development of 70 homes so Infinity’s customer service team assisted with ‘take-off’ from drawings, and managed materials scheduling so items arrived as they were needed throughout the development.

The Infinity high performing galvanised steel range was chosen for its:-

- Stylish design
- High capacity flow/drainage
- 15 year product warranty
- and being 100% recyclable at end of life

The Infinity galvanised steel guttering system offers a superior finish to a roofline that cannot be matched by other systems.
