

# VANITY II

# VANITII

*Once upon a time, a woman was captivated by old Hollywood glamour. She always dreamed of doing her makeup in one of the fancy backstage mirrors she saw in films. She loved their mesmerizing shine, like the undisturbed surface of a pond, and brightly glowing orbs of light dotting the periphery on all sides. They seemed to cast a perfect luminescence on the face - as if the mirror itself made people more beautiful for being reflected in it.*

*Her loving husband took note of his wife's infatuation with these Hollywood-style mirrors, and set about constructing one for her as a gift. She loved his creation so much that she insisted they turn it into a business, so all women could experience the same Hollywood glamour at home.*

*With that, the Vanitii brand was born:*

*a family business, down to the family name.*

Over 10 years later, Vanitii is now known as one of the top 3 in the industry - specializing in cosmetic mirror production, research, development, sales, and services.

In fact, each year 3 million new families across the US and Europe use Vanitii mirrors in their homes and businesses, and the numbers keep growing! Our small family dream has become a global success!
