

Lizzie Bun's Townhouse Assembly

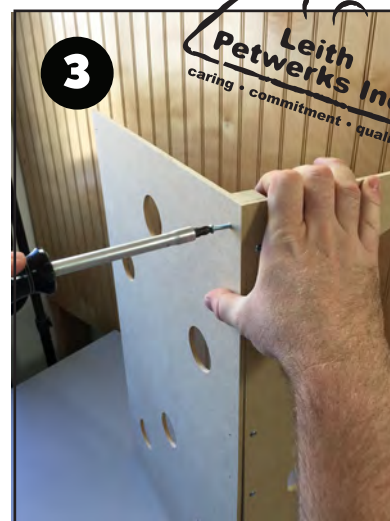

Assembly is simple, and will require only a philips screwdriver. If you have a power screwdriver, all the better!

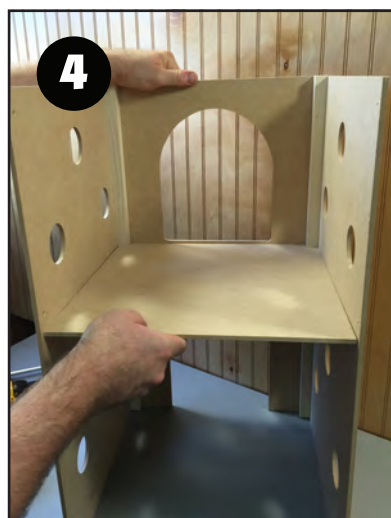

Step 1. The SIDES of the item have holes/viewing windows, while the FRONT and BACK have the arch door.

Step 2. Pick up one SIDE and hold it so the holes/viewing windows are like so. Then, pick up a FRONT.

Step 3. Hold the panels together to form a corner, insert a screw into a predrilled hole. Twist until the screw sits flush. Repeat for all four screws on that corner.

Step 4. Repeat with the other SIDE panel to form a "U." Slide the floor into the groove, fitting into the front groove.

Step 5. Screw on the remaining BACK in the same fashion, making sure to nestle the floor into the groove.

Step 6. Voila! You have a wonderful new play place for your rabbit. (Cats love them, too!)

Add a ramp to the floor, or run a ramp between two Townhouses. Lizzie approves!
