# The Dr. Lori Gerber Method

## TRAINING PROGRAM OVERVIEW

FIVE SECTIONS ARE COVERED DURING THE TRAINING

### 1 Basic Botulinum Toxin Injection & Introduction to Filler

#### KEY TOPICS INCLUDE (BUT NOT LIMITED TO):

- Focus on the Dr. Lori Patient Assessment Process - How to perform The "Dr. Lori Process" Assessment & Plan for botulinum toxin and dermal fillers
- Discussion on aging skin and how the skin, bones and structure change over time
- Indications and contraindications for botulinum toxin and dermal fillers
- Comprehensive education in the anatomy, neurophysiology, musculature and circulatory system of the oral and maxillofacial areas
- Review safety and risk issues for botulinum toxin and dermal fillers
- Learn sterile technique for the use of injectable pharmacologic agents
- Learn the various dilutions for botulin toxin and aesthetic outcomes
- Learn how to use and create an injectable crash cart
- Receive in-depth education on the physiology and pharmacology of the various injectables
- Learn how to integrate botulinum neurotoxin and dermal filler therapy into therapeutic and aesthetic treatment plans
- Volumizing nasolabial folds, marionette lines, and lifting up the corners of the mouth using anatomical landmarks
- Learn how to create beautiful and subtle lip enhancements by increasing volume to establish proper lip and smile lines
- Smoothing lip lines and eliminating vertical "smokers" lines
- Observe substantial model patients during the course
- One-on-one comprehensive mentored instruction as you work hands-on your model patient
- Establish correct fee structures for injectable treatment
- Coverage of all necessary office forms and informed consents required for treating patients immediately

### 2 Advanced Injectables Topics Include

- Botulinum toxin for other treatment areas such as neck, chin, TMJ, tender points, occiput, jawline slimming, headaches, myofascial pain and tender points
- Non-surgical rhinoplasty with filler
- Volumizing cheeks, jawline and chin contouring
- Under-eye filler / tear trough treatment
- Learn best practices to avoid, manage, and treat possible adverse reactions and complications
- Perform live patient training including comprehensive diagnosis, treatment planning, proper dosing and delivery of botulinum neurotoxin and dermal fillers
- Establish correct fee structures for oral and maxillofacial injectable treatment
- Coverage of all necessary office forms and informed consents required for treating patients immediately

### 3 Alternatives to Neurotoxins and Fillers Topics Include:

- Spider vein sclerotherapy
- PDO threads textured, smooth, twists
- Kybella - chin fat dissolving
- Non-surgical rhinoplasty with filler
- Chemical peels

### 4 Review of Case Studies

- Review actual patient case studies and put your understanding into practice by discussing – Before & After topics like,
- Discuss protocols & procedures
- Discuss risks
- Review relevant didactic material

### 5 Q & A Session

- Review any myths/misconceptions - your chance to ask questions in an informal setting.

## Virtual Certification

- Received after writing Case Presentations of your personal work in the field with before and after photos - see more details on last page.
