PowerCat™ 6A Shielded Patch Cord

Features and Benefits

The Molex PowerCat 6A Shielded Patch Cords are key components of the PowerCat 6A Shielded end-to-end solution.

Molex PowerCat 6A Shielded Patch Cords were specifically designed to support high speed data networks for 10-Gigabit Ethernet (10GBASE-T) applications. The patch cable is made from high quality shielded four pair 26AWG stranded wire. Available in a range of colors and lengths, PowerCat 6A Shielded patch cords are pre-terminated with RJ45 shielded plugs and feature over-molded anti-snag strain relief boots.

Molex recommends the full range of PowerCat 6A Shielded products be used in a end-to-end system to maximize cabling performance. This system is compliant with latest ISO/IEC 11801 A1.1 draft and ratified TIA/EIA 568-B.2-10 for the support of 10G BASE-T.
