*Design in sturdy E-flute resulting in optimised usable dimensions and lower transport and storage costs.

Sustainability. For the sake of the environment.

There are many arguments in favour of paper packaging. Our claim goes even further.

Sustainability should be more than just a buzzword. We take an honest approach to this sensitive topic. Corrugated cardboard and cardboard are natural materials and can be easily and 100% recycled. Our **ColomPac®** products are of course FSC® certified and are produced regionally in Austria. We act responsibly by constantly optimising

our products, considering the optimised use of materials and, where possible, minimising greenhouse emissions in the value chain. But our claim goes further: more ideas instead of more material, well thought-out instead of simply copied - this is how we make **ColomPac®** an ever-better product.

FSC® is the abbreviation for Forest Stewardship Council®, an international organisation that promotes socially and environmentally responsible forestry. The FSC® logo shows that we have been certified by independent auditors and that the prescribed standards are met in all our production stages. This is checked annually. You can find the certificate on the ColomPac® website under Downloads.

ColomPac® packaging is 100% recyclable and can be recycled up to 20 times without any loss of quality thanks to the material qualities used. To ensure that this valuable raw material can be easily returned to the recycling cycle, the products are labelled with the recycling codes PAP 20 (corrugated cardboard) and PAP 21 (solid board).

ColomPac® products are FSC®-certified and 100% recyclable.

From raw materials to our customers - responsible use of all resources.

The further reduction of our CO2 emissions across the entire value chain is our goal:

- Optimised use of materials
- Reduction of own energy consumption through state-of-the-art systems and regular monitoring
- Use of renewable energies - more than 11,000 m2 of photovoltaic systems and the use of green electricity
- Heat recovery and groundwater cooling
- Sophisticated logistics by reducing empty runs and optimising pallet utilisation.

In addition, we are making a voluntary offsetting contribution for our **ColomPac®** products in 2024 by investing in climate protection projects.

CP 035

For maximum in-transit protection
from door-to-door — the strong mailers

More than just packaging. Showcase your brand!

Offset, flexo or both?

Interior and exterior? Everything is possible.

Your print data - Our service!
We will help you create the print data.

Contact us!
sales@packagemate.com

Individually

customised and designed

Design by ColomPac®.

Packaging is the marketing tool that never fails to reach the customer and its importance should therefore not be underestimated. Design by ColomPac® is your one-stop shop for agency services and professional implementation.

We take your wishes as a starting point to create an initial graphic design, which we then convert into final print data together with you.

Individual designs.

If something is particularly large, long, heavy or just needs to stand out, we leave it up to our developers. This is how a "tailor-made suit" for your product is developed.

Printing methods

that catch the eye and convince

Flexographic printing.

Suitable for displaying your logo or company branding directly on the packaging. Up to 2 colours are printed directly on corrugated cardboard with flexo printing. You get your own individualised packaging from 5.000+ units.

Offset printing.

Can do even more. Photorealistic displays with up to 6 colours. Whether you're looking to personalise the exterior, interior sides of your packaging, offset printing can create personalised packaging to showcase your brand personal that your customers will love. Additional refinements such as embossing or matt varnishing will turn your packaging into something spectacular.

Further inspiration on individual packaging can be found at www.colompac.com.

CP 154

The perfect fit.
ColomPac® Euroboxes designed for pallets.

The best thing since the invention of the pallet.

Different sizes, multiple possibilities. Featuring fast to assemble bases for efficient packaging, Euroboxes are designed to stack and conform to Euro pallet dimensions without overlapping. This saves space in the cargo compartment, the warehouse and lowers costs.

Perfect on the pallet

Complete range

Perfect folding:
The quick base

Perfect infiltration protection: Z-folding on the cover
