

MT08: Number Cards

Use microMAGS to build directly on the numbers for scaled, tile-on-top practice or use classic MAGNA-TILES to build off the card for full-size inspiration! Just grab a few squares, right triangles, and equilateral triangles to get started.

Print: Print all ten number pages for hands-on math fun.

Build & Trace: Build directly on the number outlines with microMAGS, then trace and write the numeral and word (e.g., 3 / three) to reinforce number formation and spelling.

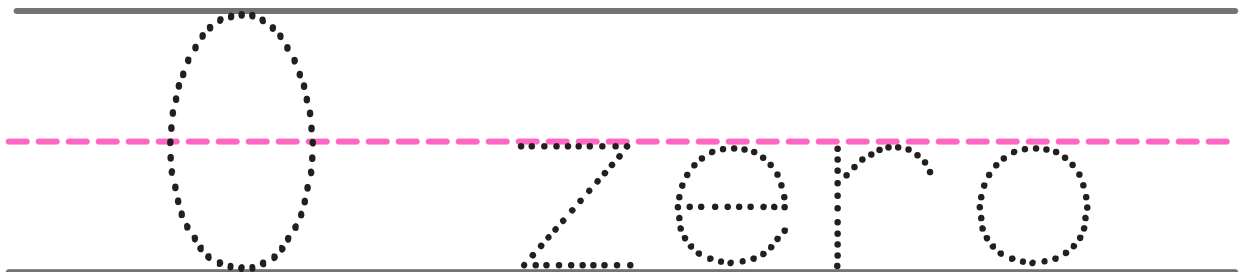

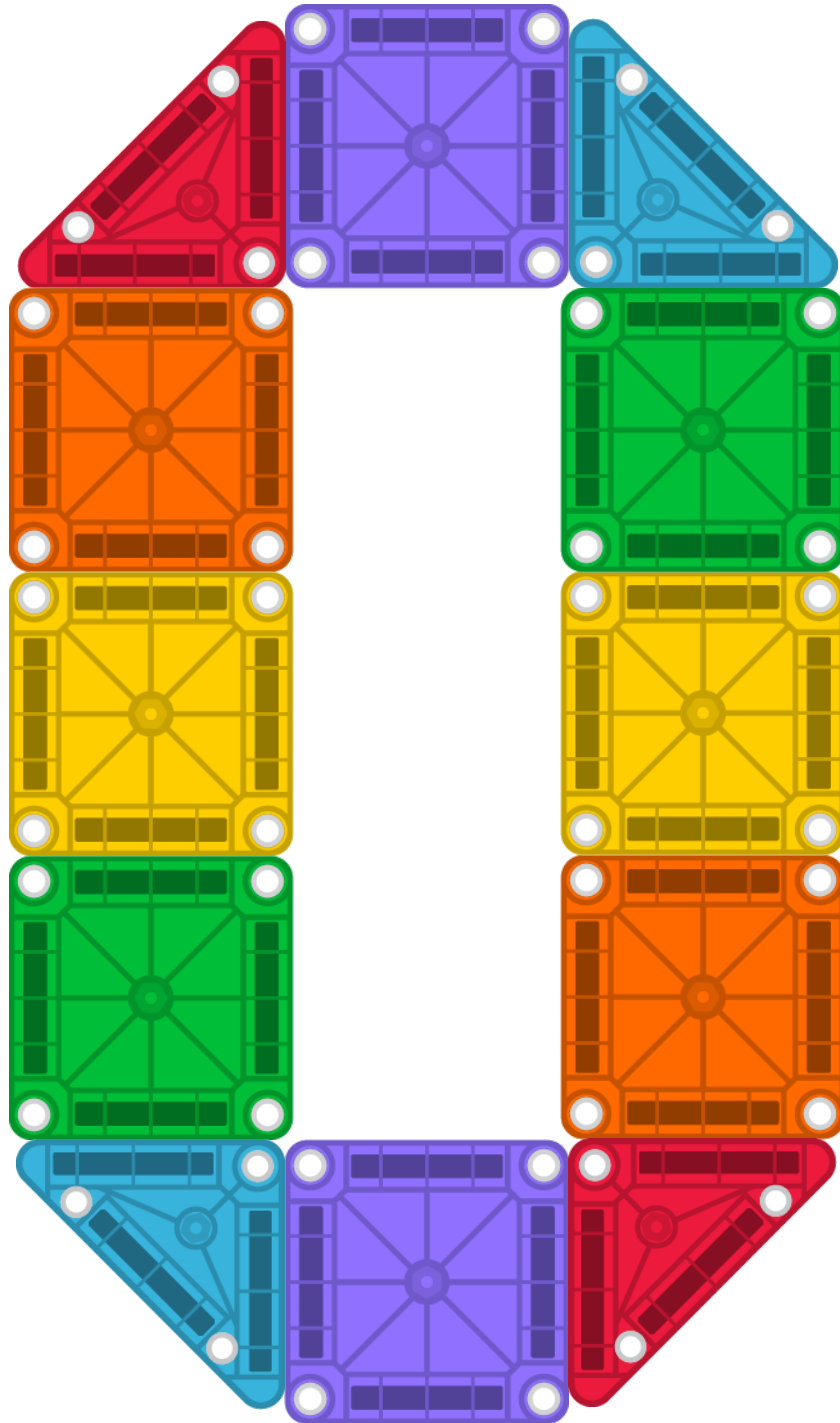

Make It Last: Laminate each page for repeated practice.

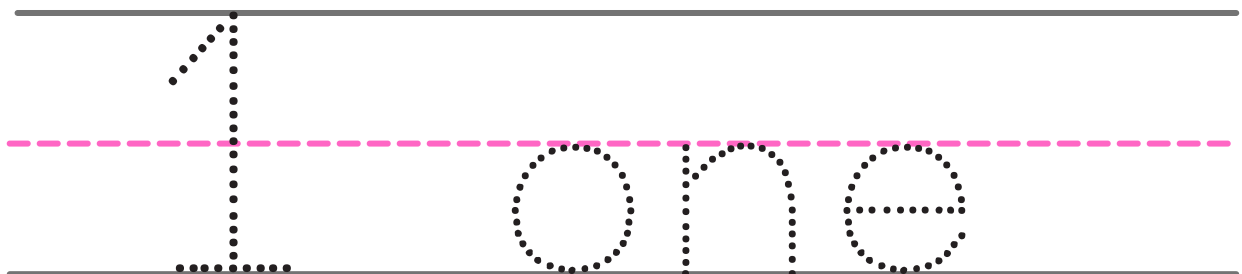

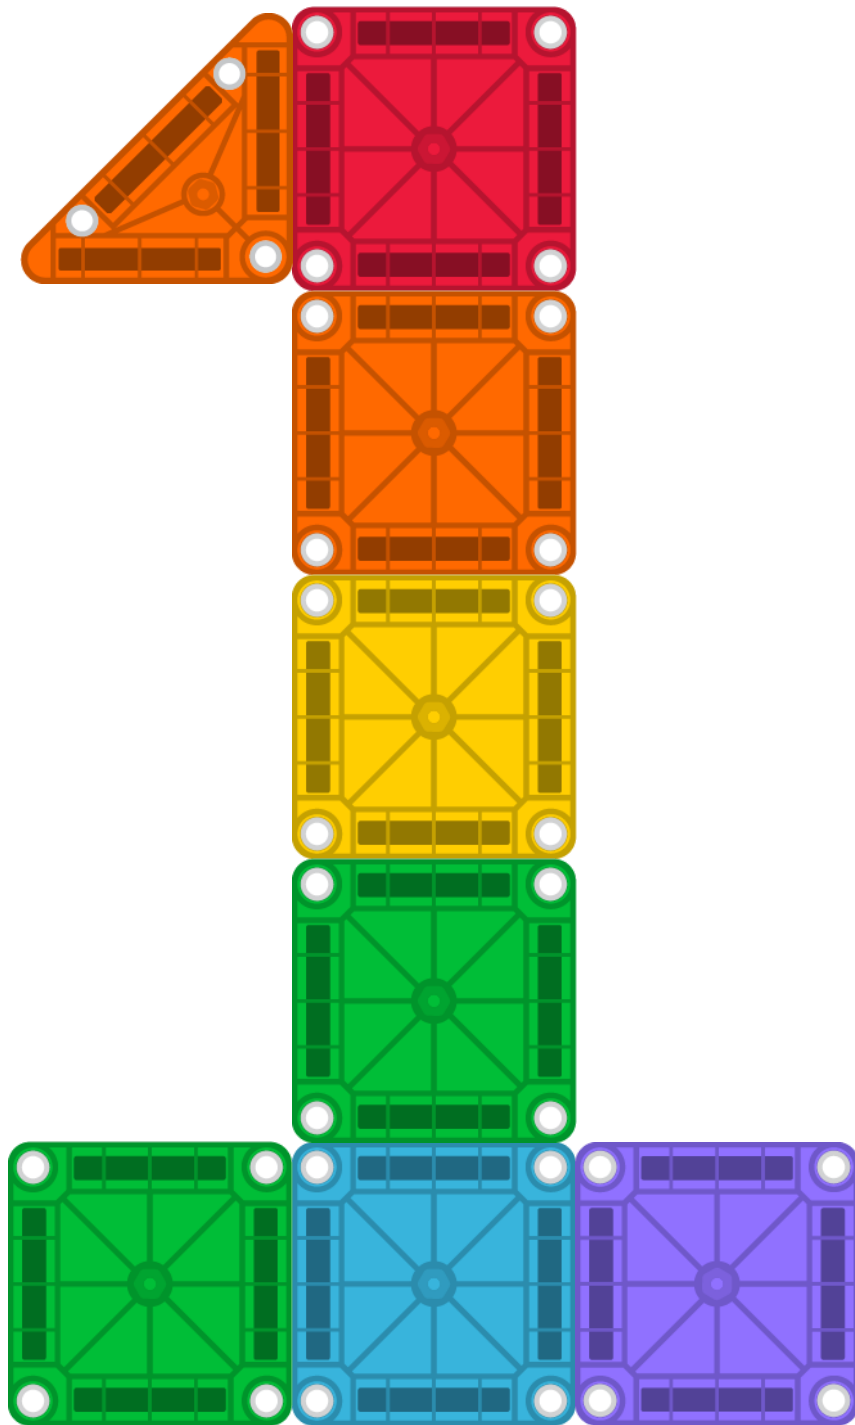

Get Creative! Tag @magnatiles and use #MAGNATILES and #MeaningfulPlay to share your number-building adventures.

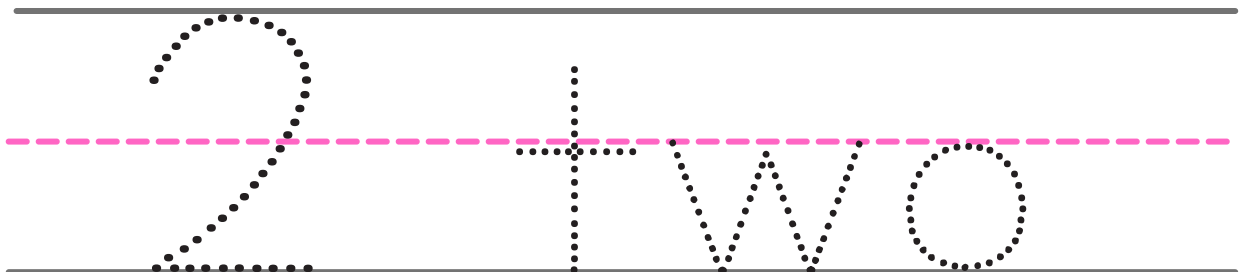

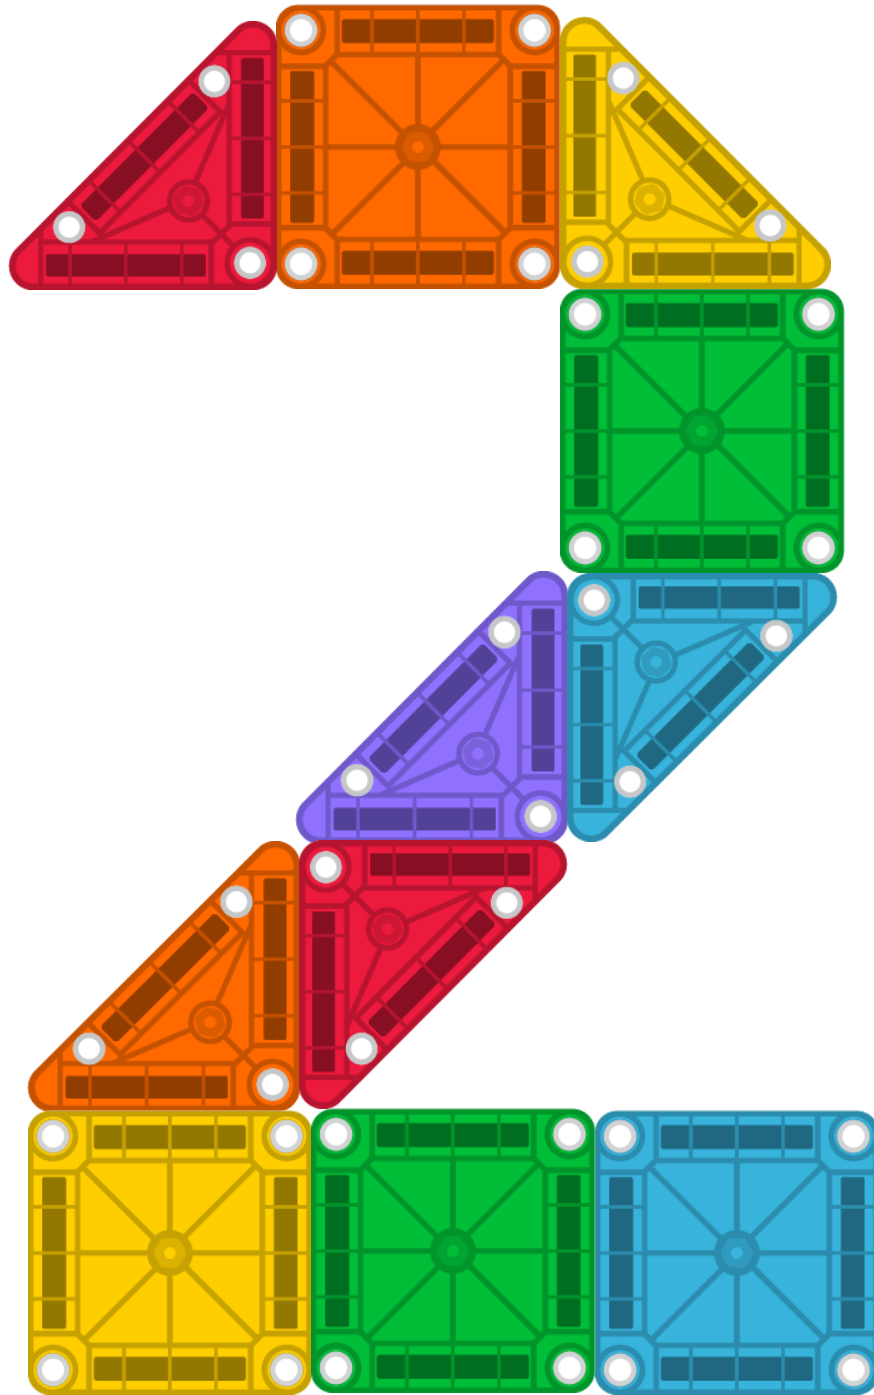

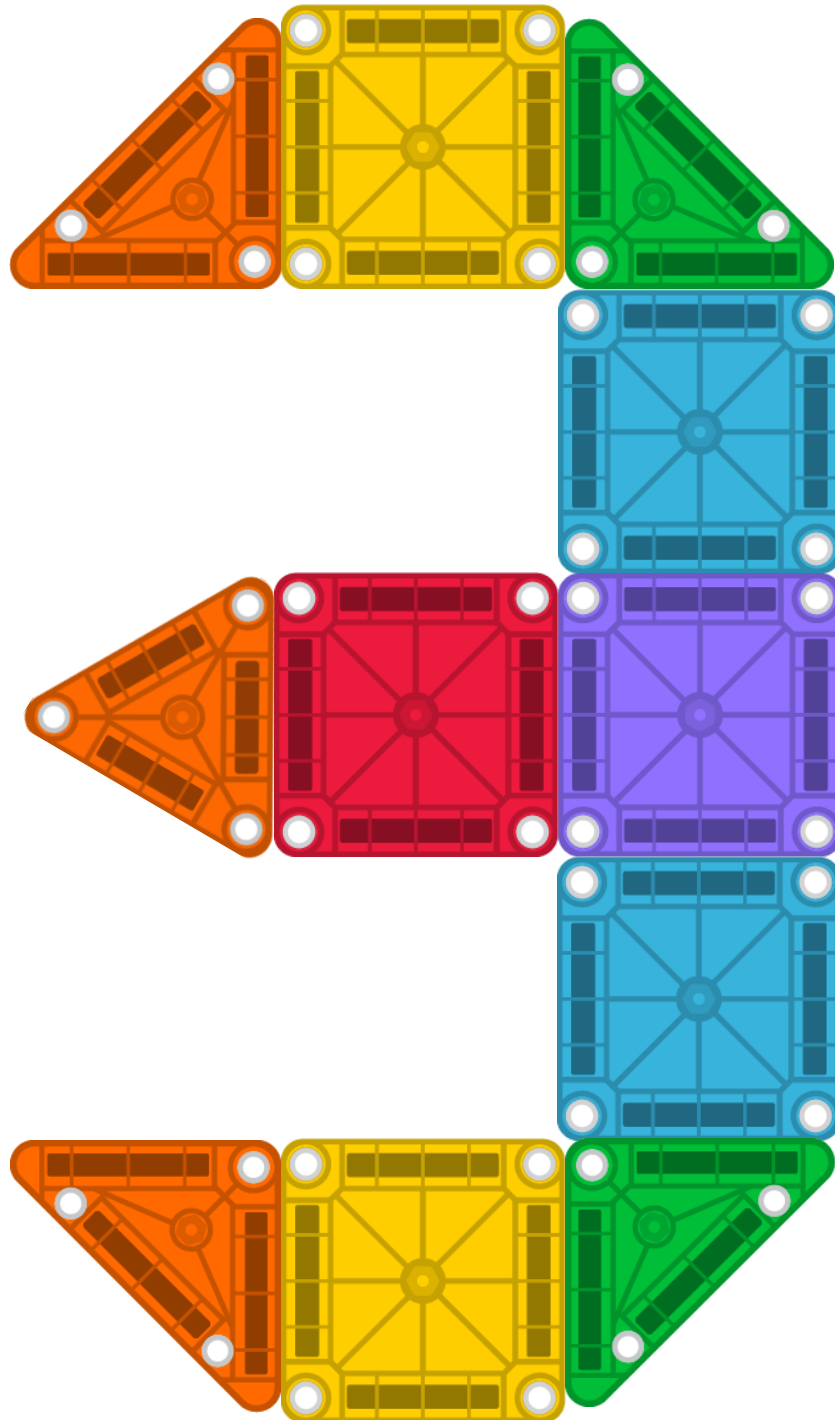

Perfect for preschoolers (ages 3–5), this activity aligns with the Head Start Early Learning Outcomes Framework (ELOF) and reflects NAEYC's DAP guidelines. Explore the Alignment Guide to see which skills it helps develop.

Not familiar with ELOF or NAEYC? No problem! These are the gold standards in early childhood education. It simply means your child's playtime is packed with learning.
