

## My Action Research Project

**What is my focus/interest? What do I want to know?**

**What is my research question (e.g., if I do x, will y happen?)**

**Who will mentor me in this process? Who will guide/approve my research design?**

**Who am I studying? How will I protect their confidentiality (e.g., de-identify all data)? How will I get their approval?**

**Where will my study take place? For how long will it go on (starting/ending dates)?**

**What procedures will I follow to consistently conduct the intervention/collect data?**

**What data will I collect/gather in order to answer my question?**

<b>Data Source</b>	<b>How it will answer research question?</b>

**How will I analyze my results (e.g., which statistical analyses)?**

**How will I share my results? (If you plan on publishing, you will need IRB approval.)**
