## iKlear®

#### APPLICATION GUIDE

iKlear is the original line of cleaning kits designed to safely clean, preserve, and enhance the appearance of your Apple® products.

Our exclusive solution does not contain alcohol, ammonia, sodium Jauryl sulfate or butoxyethanol (a solvent used in some cleaners). This makes iKlear the safe choice to clean everything from an iPad™ to a Cinema display as well as all brands of these popular electronic items:

- iMac<sup>®</sup>, MacBook<sup>®</sup>, Desktops, Laptops
- iPad® Touchscreen Tablets
- iPhone™, Smartphones
- Apple Watch, Smart Watches
- eBook Readers (Kindle®, Sonv®)
- · OLED, LED, LCD and Plasma Flat Panel · Digital Cameras / Camcorders Televisions
- Big Screen & Home Theater Projection Systems

- · Automobile LCD / GPS Displays
- Scanners / Copiers
- Graphic Tablets
- Portable DVD Players
- · CD, DVD & Blu-ray discs
- · Precision Optics

#### iKlear Microfiber Polishing Cloths

Included in many of our kits is our unique DMT (Dual-Micro-Texture) antimicrobial microfiber cloth. One side has a textured feel, the other side is soft and smooth. It's perfect for cleaning and polishing a variety of surfaces on your electronic devices. Try both sides to find which one works best for vour specific device.

The design of microfiber makes it ideal for removing fingerprints, dirt and dust particles... including bacteria. Our DMT cloth is treated with a special antimicrobial agent that helps eliminate up to 99.0% of bacteria within the cloth fibers from the surface you're cleaning.

Cleaning your Microfiber Cloths or Microfiber Keyboard Cover: All of our microfiber cloths are reusable and easy to clean. We recommend hand washing your cloth with a small amount of liquid detergent in warm water. After washing, rinse well, wring out excess water and let air dry. Do not iron! Cloth storage tip: After using, and once dry, place microfiber cloths in a ziplock or similar bag to prevent them from picking up surrounding debris.

#### Application & Polishing Instructions

(Please read all instructions carefully before applying)

Step 1: Applying Solution - Turn off electronic device and let cool. Apply to screens 13" or larger directly with pump spray (one spray per sq. ft. of screen) or moisten a corner of the microfiber cloth or use a pre-moistened Travel Single. Wipe screen side to side (see figure 1). Note: If spraying screen directly, please hold bottle approx. 6" from object being cleaned and always use caution to prevent spray and/or drips from entering unsealed gaps in electronic device or screen! Do not spray small screens or screens under 13" directly with spray bottle.

(figure 1)

Step 2: Polishing Off - Using a dry section of the microfiber cloth, immediately polish off solution side to side and top to bottom (see figure 2). Keep polishing until solution is no longer visable. When cleaning flat panel screens, please support with your opposite hand while cleaning. For best results, screens larger than 24" can be cleaned in smaller sections at a time

rather than all at once.

(figure 2)

Cleaning tip: Step1 wet/ cloths may often be reused for 2-3 more days by placing back into foil pouch and folding down to lock out air. Discard if heavily soiled or dry.

**CAUTION:** To prevent slipping, avoid overspray or spills on either smooth or hard finished floor surfaces.

iKlear spray solution is 100% non-toxic and is safe to use around children and pets!

### **Product & Device Specific Instructions**

#### MacBook, MacBook Pro, MacBook Air and other Apple Laptops

iKlear can also be used to clean the keyboard, palm rest area, and case of your laptop. Spray small section of microfiber cloth or use Travel Single to apply solution, then polish off. Clean trackpad using a dry portion of microfiber cloth

#### iPad, iPhone, Smartphones and other small screens

For best results, use iKlear as often as you like. Spray a small section of microfiber cloth or use Travel Single to apply solution, then polish off.

Cleaning tip: Use our antimicrobial DMT cloth "dry" between cleanings to remove bacteria, fingerprints and smudges from screen and case. Never spray solution directly onto iPad, iPhone, iPod or similar device!

#### iMac, Apple Cinema Display

Follow Step 1 / Step 2 directions on page 1. iKlear can also be used to clean the aluminum or acrylic case of your iMac or display.

#### Mac Pro

For best results, spray a small section of the microfiber cloth, then wipe the aluminum case of the Mac Pro and Mac G5. Immediately polish off the solution with the dry portion of the cloth.

# HD Flat Panel Displays (OLED, LED, LCD and Plasma) and LCD Projectors For best results, use iKlear from the spray bottle with the microfiber cloth and follow the Step 1 / Step 2 directions on page 1 large screens should be

For best results, use intear from the spray bottle with the microhiber coun and follow the Step 1 / Step 2 directions on page 1. Large screens should be cleaned in 4 sections at a time. iKlear can also be used to clean the case or frame of your display.

**Cleaning tip:** iKlear produces an anti-static finish to help minimize excess dust buildup. Use once a week to maintain this effect.

#### Blu-ray, DVD and CD discs

Lightly mist both sides of disc. Polish off solution wiping in straight lines from the inside outward. By cleaning the non-playing surface, the static charge is removed from both sides of the disk.

#### Digital Cameras, and Digital Camcorders

For best results, moisten a small corner of our microfiber cloth. Directly apply the moistened cloth to digital camera lens and viewer. Polish off with a dry portion of microfiber cloth. \*Hold delicate items securely while cleaning.

Keyboards

Turn off computer. Moisten microfiber polishing cloth with iKlear solution and gently polish each key using a circular motion. For laptop keyboards lightly moisten cloth with iKlear and wipe back and forth across keys. Then use a dry portion of the cloth to polish off iKlear.

#### For best appearance, re-apply solution once a week.

iKlear has been recommended by Apple Tech Support, was used at the Apple Genius Bar™ and is currently used by Apple Care™.

Klear Screen and iKlear have been safely cleaning, protecting and enhancing Apple® products since 1992.
