# Set up Headphones & Microphone

1. Make sure you have a headset with the correct cables. You need a Microphone jack and an Headphone jack to use on a PC. Some headphones also use a USB for power.

2. You can connect to the PC front or back ports.
Green = Headphones
Pink = Microphone

3. Right click the sound icon on the taskbar and make sure that your headset is set for playback.

Select playback device

Monitor / Speakers (NVIDIA High Definition Audio)

Headphones (Realtek High Definition Audio)

2269WM-4 (NVIDIA High Definition Audio)

8

14:50

4. Right click the sound icon and open the sound settings on Playback.
Make sure that your headphones are set to default.
Right click and choose test - the green bar should go up and down.

If it doesn't make sure that your headset does not have a volume control anywhere on it.

5. On the sound settings choose Recording. Make sure your headphones are set to default. On the properties windows make sure that the levels are set to high.

Configure your Speech Recognition experience

Start Speech Recognition
Start using your voice to control your computer.

Set up microphone
Set up your computer to work properly with Speech Recognition.

Set up your microphone

Proper microphone placement
- Position the microphone about an inch from your mouth, off to one side
- Do not breathe directly into the microphone
- Make sure the mute button is not set to mute

Read the following sentences aloud in a natural speaking voice:

"Peter dictates to his computer. He prefers it to typing, and particularly prefers it to pen and paper."

Note: After reading this, you can proceed to the next page.
