

THE RENEWABLE AND COMPOSTABLE LABELLING ALTERNATIVE

NatureFlex™
films for labels

NatureFlex™ films for labelling

Self-adhesive labels can be a cost effective and adaptive solution for all types of packaging. They are particularly useful to brands who want to maximize the flexibility of their stocks. Today, they are used on many substrates, from rigid containers to flexible formats.

Our NatureFlex™ films offer an alternative to the conventional plastics used in these applications. They are highly renewable, as they are derived from wood pulp, sourced only from managed plantations. In addition, they meet the global standards for industrial composting and home composting and are also suitable for energy recovery via emerging anaerobic digestion technologies. They are ideally suited to labelling compostable food packaging, for example fruit and vegetable applications.

Discover our range of clear, white and metallic materials for self-adhesive facestock.

Why choose NatureFlex™?

PERFORMANCE

- ✓ Easy to process : excellent printability and adhesive key
- ✓ Excellent die-cutting and dispensing
- ✓ High gloss for a strong visual
- ✓ Approved for direct food contact
- ✓ Available in clear (NVS), white (NVS White) or metallised (NM)

RENEWABILITY

- ✓ Derived from wood pulp sourced from responsibly managed plantations
- ✓ High renewable content in the finished film, typically >90% (ASTM D6866)

END OF LIFE OPTIONS

- ✓ Certified for industrial composting (EN13432, ASTM D6400, ISO 17088)
- ✓ Certified for Home Composting (AS 5810, NF T51-800, OK Compost Home)
- ✓ Suitable for energy recovery via emerging anaerobic digestion technologies
- ✓ The use of a compostable adhesive is recommended
