Taste the Fragrance

**We've travelled from Bunbury to Dowerin and back  
So you can experience the wares of The Shack**

# Welcome to The Candle Shack

Hand Poured in Bunbury, Western Australia, the award winning Candle Shack's soy candles and melts will provide a full fragrance experience for your home.

We were shocked to learn of the carcinogens being emitted by paraffin wax and immediately The Candle Shack knew we had to alert the community of these issues.

In our quest to ensure candle lovers knew of these toxins, we discovered an alternative. Soy wax, a natural wax that emits the natural fragrances we lovingly add.

All of The Candle Shack's scented soy candles are hand-poured in Bunbury, Western Australia. The fragrances we use are the highest quality, we only use natural fragrance oils and essential oils to create the fragrance blends that not only provide a wonderful aroma, but also piece of mind knowing that the fragrance will last, right through to the bottom of the jar.

Here at the Candle Shack, we will always endeavor to provide an environmentally friendly candle that delivers a quality scent the whole way through the candle. We are continually learning and experimenting. We always value input, ideas and queries from our customers, so feel free to contact us and give us your feedback.

## Soy Wax

Soy Wax is a 100% natural and 100% biodegradable product! Therefore being safer for you to use in your home and safer for the environment!

Gone are the days of scraping dry wax or pulling out the brown paper and iron. If you spill a soy wax candle on your clothing, carpet, or almost any surface, it will simply wash out with warm, soapy water.

Soy candles melt at a much lower temperature, therefore the wax burns warm, not hot. So any nasty spills on the body will not cause scalding. (Please note the flame will still burn you if touched, it may also cause the glass jar to heat at times, after all, it is fire)
