

# Vikta KomfiTilt \*CLRT System

'making a turn for the better'

- ✓ 10 Min Cycle Time
- ✓ 200 Kg Weight Guide
- ✓ Easy On/Off Controls
- ✓ 5 Yrs Warranty

(\*Continuous Lateral Rotation Therapy)

The KomfiTilt is a lateral rotation therapy system that lays onto the bed frame, underneath the mattress and provides a lateral tilt (the length of the bed, from head to foot) of 20-25 degrees. To provide offload and redistribution of the users body weight, therefore reducing pressure points developing and providing a better nights sleep.

## How It Works

Fits on any bed  
(underneath the mattress)

Easy controls for multiple  
care staff situations

## Specifications

Fits on beds of width: 80/90/100/120cm

Automated 10 minute tilt cycle time

Very gentle action, almost imperceptible to the user

Whisper quiet pump, for no user disturbance

Compatible to work with alternating air mattresses

Weight guide: up to 200kg / 31 stone

Warranty: 5years

## Benefits

- ✓ Improved tissue viability for the healing & prevention of pressure sores
- ✓ Prevents pressure points developing at vulnerable sites
- ✓ Continuous movement to promote improved blood and lymph flow
- ✓ Can speed up discharge from hospital, as a less comprehensive home care package is required
- ✓ Extends the time between turns due to CLRT (good results with MS and MND patients)
  - therefore a better night's sleep = improved wellbeing
  - less disturbance to husband/wife/partner/carer
  - lower care costs; not so frequent care visits, especially at night
- ✓ Enables use of clients existing mattress, or use of a mattress from the Equipment Loan Store
- ✓ Easy on/off controls for multiple care staff situations

## Features

- ✓ A CLRT system which gently tilts the user L/N/R to relieve any pressure points developing.
- ✓ The KomfiTilt system is placed on the bed frame under the mattress and is operated on an independent power and pump supply
  - fits on any bed (underneath the mattress)
  - can be used with foam and alternating aircell mattresses
  - can be used with profiling beds. Back angle adjustment, Trendelenburg / Anti-trendelenburg, Knee break
- ✓ When switched on, the KomfiTilt inflates to 20-25 degrees to provide offload of pressure points and redistribution of body weight loadings.
- ✓ The KomfiTilt proceeds through left-neutral-right function on an automated 10 minute cycle time
- ✓ Unique auto-deflate CPR function on switch off
