

Installation Instructions

SKU: AWL003

Dear user: Thank you for using this product. Please read the instructions carefully for installation.

Tips:

In order to prevent the cable connector from shaking during transportation, please test the power supply before installation.

Prompts:

Please entrust professionals to install it to avoid danger of electric shock.

Precautions:

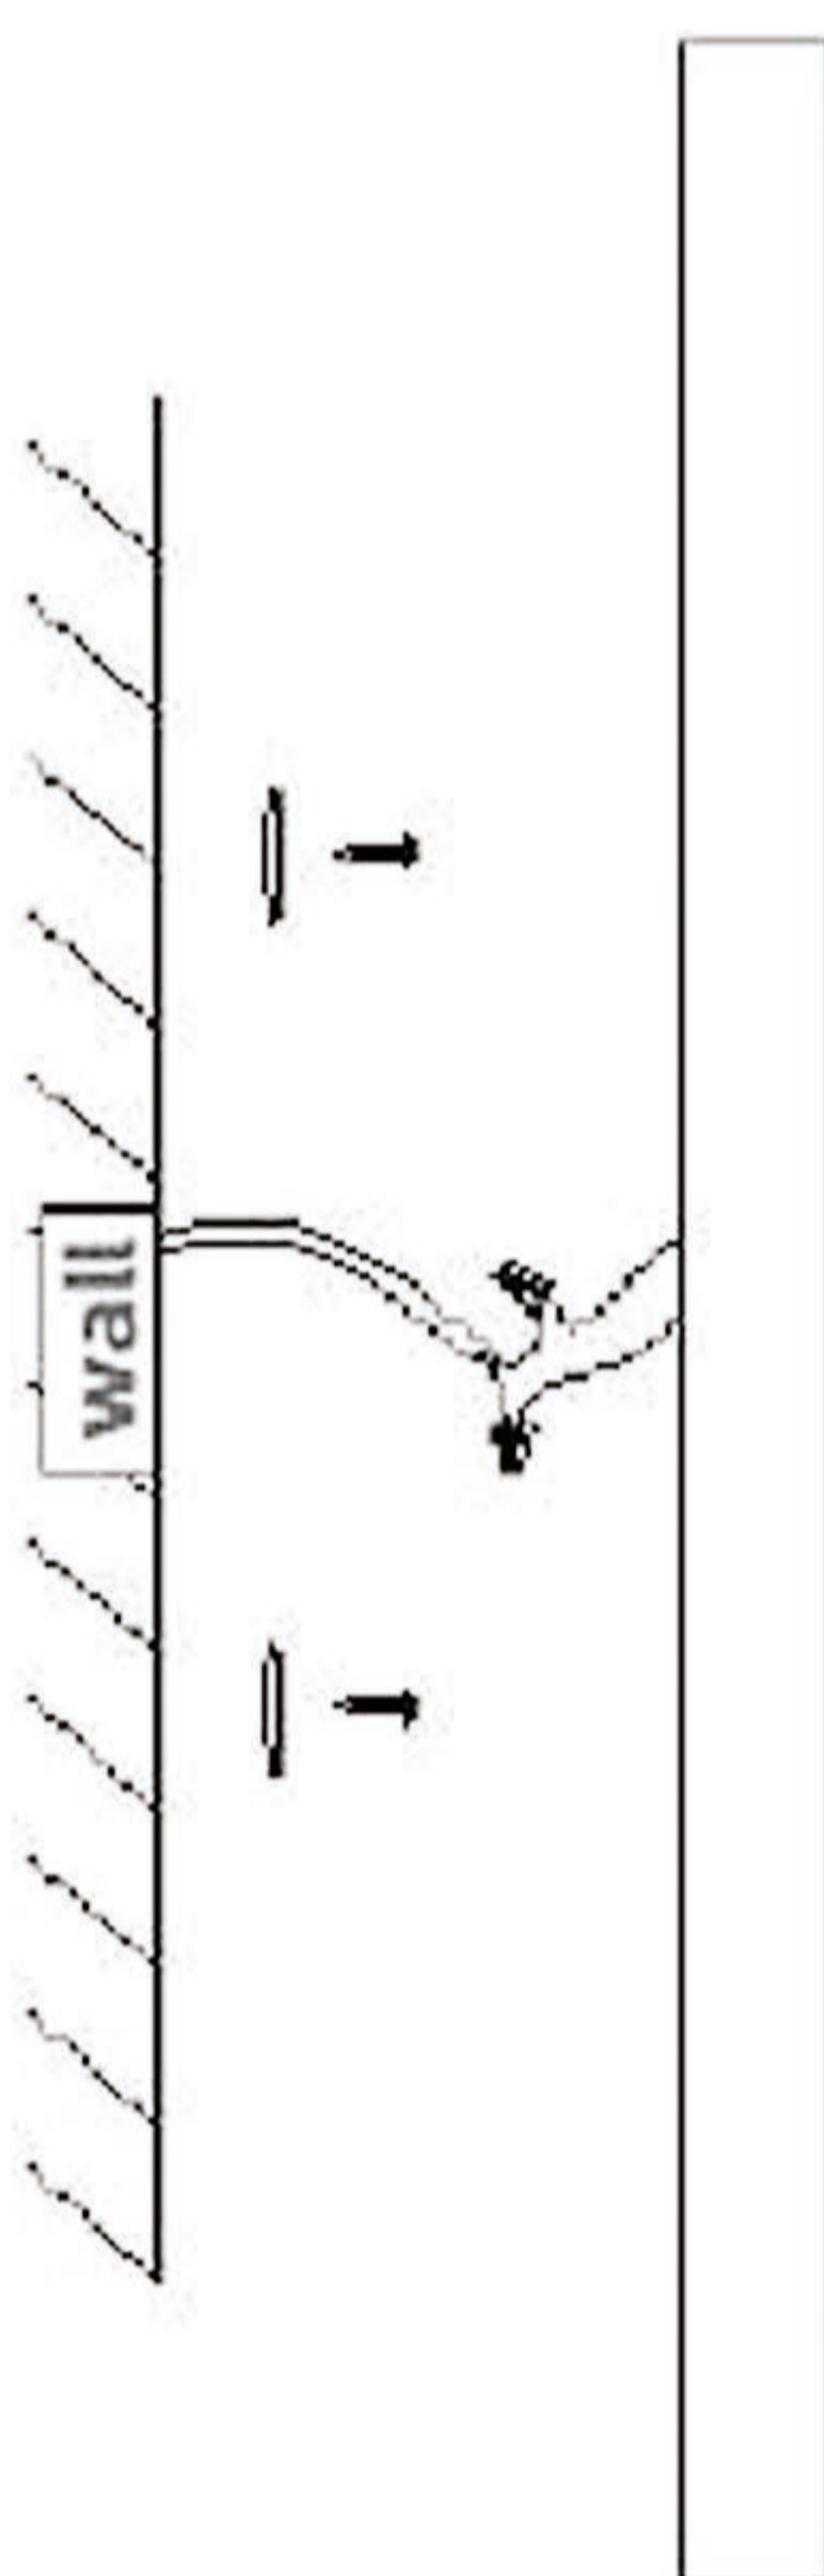

- 1: The power supply used cannot exceed the specified range.
- 2: Do not install the lamps on unreliable walls.
- 3: Do not install lamps and lanterns above high temperature objects or on stoves.
- 4: Turn on the power. If the light does not light up, please check whether the cables and connectors are loose, whether the light bulb is in good condition and whether it is in poor contact.
- 5: When there is a problem with the lamp, in order to ensure safety, please entrust a professional to repair it.

Installation Instructions

SKU: AWL003

Dear user: Thank you for using this product. Please read the instructions carefully for installation.

Lamp Installation Steps:

- 1: Determine the installation position, align the hole spacing, and fix the hanging plate with expansion screws on the ceiling.
- 2: Connect the main line to the terminal of the lamp body (L is connected to the live wire; N is connected to the neutral wire).
- 3: Install the lamp body, lock it with screws and hang plates from both sides of the chassis, and adjust the light to be on.

Note: Before wiring and power test, be sure to turn off the power supply.
