Push Button Ignitor Mounting Plate

The Push Button Ignitor Mounting Plate is built with thick, rigid, stainless steel construction and comes with pre-drilled holes for easy mounting. Enjoy instant flames as this convenient accessory makes it easy to locate your fire pit's spark igniter push button.

- **CONVENIENCE:** Finalize the look of your outdoor fire pit with the addition of a Push Button Ignitor Mounting Plate. Enjoy instant flames as this convenient accessory makes it easy to locate your fire pit ignitor push button.
- **OUTDOOR FIRE FEATURE:** Our 6.25" X 5.5" Push Button Ignitor Mounting Plate's sleek design makes for a seamless integration into any styled fire feature.
- **DIMENSIONS:** The Push Button Ignitor Mounting Plate measures 6.25 inches x 5.5 inches and is pre-drilled with four mounting holes, one in each corner. Two larger holes towards the center of the plate are also pre-drilled to accommodate the shut off valve and the push button ignition unit.
- **DURABLE STAINLESS STEEL:** The plate is extremely durable and has been designed to withstand extreme heat and harsh weather with maximum sustainability to damage. However, we do recommend setting the plate in a position that offers some protection from the weather for the push button unit.
- **EASY ACCESS:** Provides a stable and easy to install mounting for the Shut Off Valve and the Push Button unit that should be located in an easily accessed position on your fire pit structure.
