

Visbiome Pharmacy Order Numbers

Dear Customer:

Thank you for interest in purchasing Visbiome. If you call your local pharmacy to find out if they have Visbiome in stock and they aren't aware of our product or they do not have it in stock you may need to provide them with some additional information in order to purchase. Please show this paper (or open this form as a pdf on your phone) to the pharmacy staff if they state they are not stocking Visbiome. Below are the **Visbiome Supplier Order Numbers** that you will need to share with your pharmacist. Ask the pharmacist which supplier they use based on the list below (McKesson, Amerisource Bergen etc.). Next, ask them to **"SPECIAL ORDER"** the Visbiome product you need using the supplier order code on the chart. Most pharmacies can get Visbiome within 24 hours from their distributors. Example: If you need Unflavored Powder and the pharmacy supplier is Cardinal Health the product code is: 5220280.

Remember! Visbiome is located behind the Pharmacy counter in the refrigerator to maintain potency.
