## SUPPLIED AS FULLY SELF SUPPORTING MODULES

Unlike most pools, the Team Recovery Pools do not need extra support. They are built onto a high strength aluminium frame that fully supports both the pool and all the associated equipment.

ALREADY INSTALLED IN HUNDREDS OF STADIUMS, CLUBS, COLLEGES AND HOTELS AROUND THE WORLD

## MADE FOR EASY INSTALLTION

The pool module can be quickly installed anywhere, fully or partly in to the floor or deck or free standing on the floor.

The pipe work is to international standards using pipe and fittings that are standard in most pool and spa installations around the world.
