## About SmartSign2go

SmartSign2go is a cloud-based digital signage system built from the ground up for the non-technical end-user using the latest technology for your choice of devices.

### Why Choose Us?

We come from the installing dealer world so we know what you need!

This system is designed for maximum time-efficiency with appropriate features for small to medium-sized businesses and franchises.

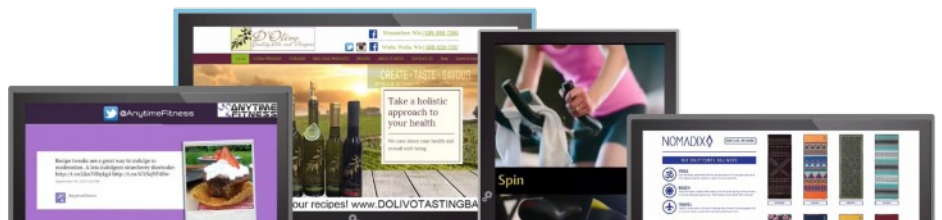

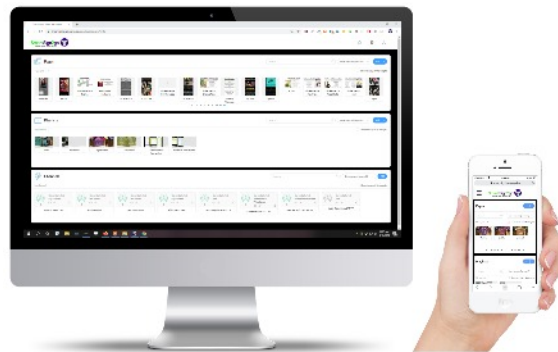

Economical hardware and low-cost service plans are easy on your pocketbook.

We manage all the technical side of things using powerful back-end systems so that you can focus on all the exciting things that you can play on-screen.

Most importantly customer support is our top priority so you'll have a great team to assist you, right here in the USA.

## EXCELLENT PRODUCT AND SUPPORT

Excellent product and support

### ★★★★★ The easiest digital sign platform to use. Great customer support!

Reviewed in the United States on June 27, 2019

Verified Purchase

We've purchased and installed a number of these digital sign players from SmartSign2Go. They are incredibly easy to use and reliable. If we ever have an issue we need to solve or a question, the SmartSign2Go team is quick and responsive. We've used other digital sign platforms in the past. None were this easy, as flexible, or came with all the widgets to give our displays the added features of weather, news, social media feeds, etc.. The best part is being able to update any sign, in any location from their online portal. We high recommend SmartSigns2Go.

### ★★★★★ Really easy to use and great customer support

Reviewed in the United States on June 5, 2019

Verified Purchase

This product is very simple to install and use, even for a repair shop with no design background. Customer support has been great and they really make the implementation a breeze. We just ordered a second unit to use in our shop because we like the first one so much.

### ★★★★★ It is SO easy!

Reviewed in the United States on June 28, 2019

Verified Purchase

I tried another product before using SmartSign2go. It was complicated and customer support was difficult to understand and went too fast for me to keep up! This product is easy, user-friendly, and allowed me to use my current documents, as well as offered templates! Customer support was easy to follow and they checked back with me later to make sure I got everything I needed!

## Our Partners:
