## SLOGAN

Technology Surrounds You

## MISSION

Provide Premium Products & Superior Services Worldwide

## VISION

Become a Trusted Intelligent Technology Company

# WE'RE DIFFERENT

- The No. 1 third-party brand of Amazon TWS best-selling products (second only to Apple in overall ranking).
- Global-registered international brand.
- Over 20 million loyal users.
- Absorbed in developing TWS earbuds for many years. Obtained multiple patents in invention, utility, appearance design and technology.
- Advanced products with higher quality, more extraordinary and more cost-effective advantages.
- Created an artificial intelligence technology product and service provider integrating industrial design, acoustic technology, quality manufacturing, and brand marketing.
- Offline retail layout is gaining momentum.

# ABOUT US

TOZO is an internationally renowned consumer electronics brand under TOZO Inc, founded in 2015 in Seattle, USA. TOZO adheres to the brand concept of "Technology Surrounds You ", focuses on innovative design and creative development, and is committed to creating portable intelligent video and audio systems for users. TOZO uses cutting-edge technology to create smart devices and accessories that are popular in today's consumer market, including high-quality smart products such as Bluetooth headphones, Bluetooth speakers, smart watches, panoramic cameras, VR&AR and digital accessories. To "provide quality products and services for global users" as the brand mission. With the support of cutting-edge technology, we provide users with higher quality products, more extreme user experience and a greener and low-carbon lifestyle.

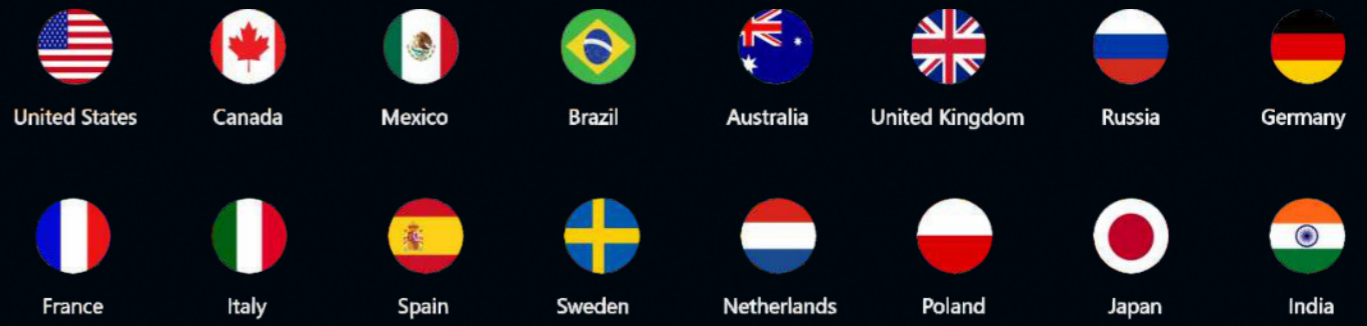

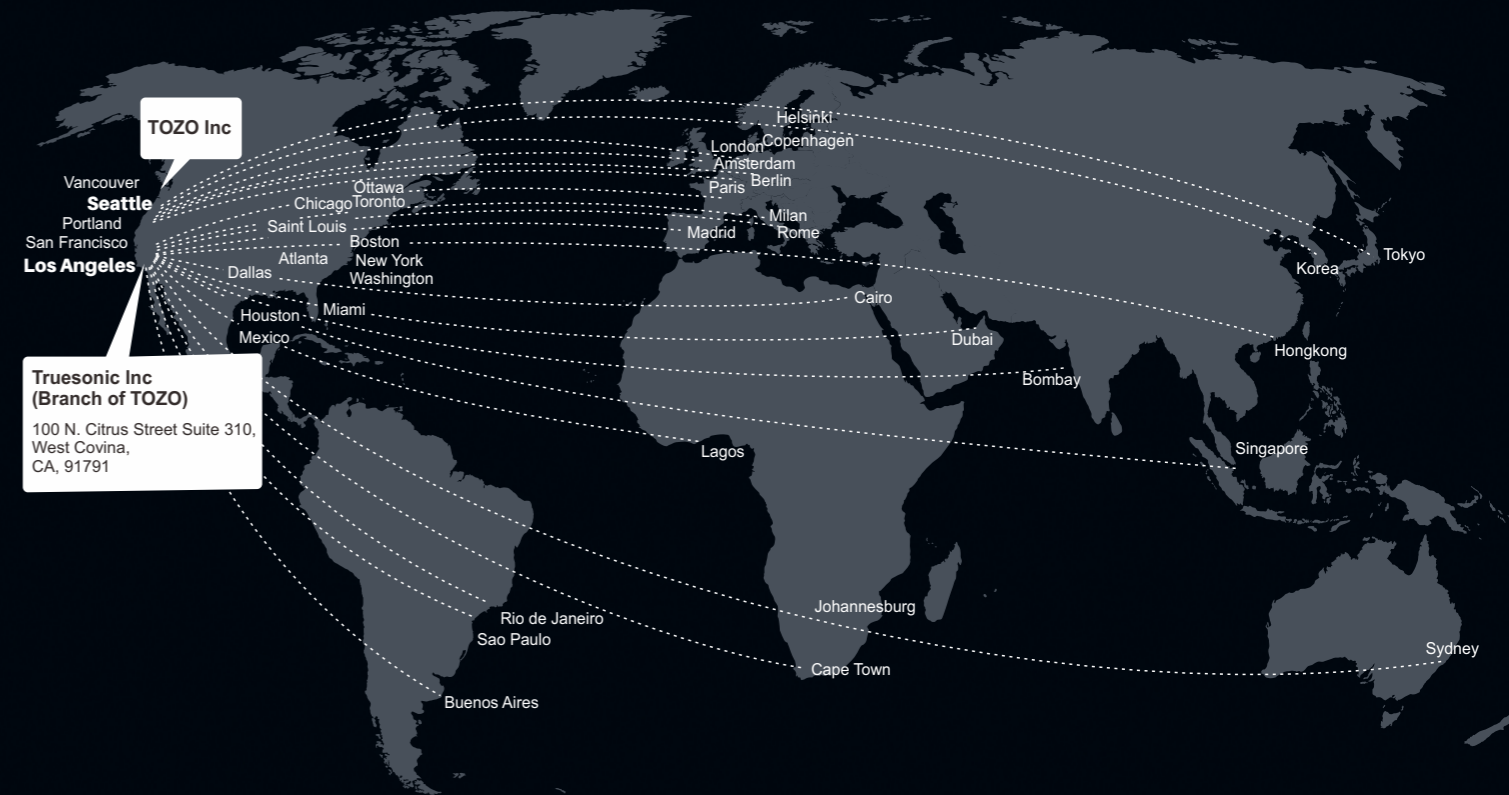

In the field of audio, TOZO takes "Technology Surrounds You" as its core product concept, to achieve the perfect integration of innovative technology and simple design, create comfortable wireless products involving ultimate experience, restore the purest sound of nature, and provide users with music Temple-like hearing enjoyment.

In the future, TOZO will not forget its original intention and use e-commerce or a broader platform as the medium to continue to work hard and create surprises in filed of technological product, technological research, development and user experience. Furthermore, we will continue to seek progress that meets the needs of users in order to create an unprecedented ultimate experience.

Carbon Nanotube Diaphragm Dynamic Driver

42dB ↓

### High Quality Wireless Music Listening Technology

From Sony's official data, LDAC HD data transmission is more than 3 times faster than SBC traditional Bluetooth coding technology, The maximum transmission speed is about 990kbps, which can enhance the wireless listening experience of music.

### ORIGX Pro Acoustic

TOZO research HI-FI digital, material and cavity acoustic technology that compensates for the frequency lost when the sound passes through the ear canal curve, keeping the sound that reaches the eardrum is closest to reality.

### Custom Armature Driver Unit with Knowles

High sensitivity and high resolution moving Armature Driver can hear more sound details and present cinema level sound effects.12mm super large Armature Driver is 90% larger than the traditional single armatured, with clear treble, soft and mellow midrange, powerful bass and transparent human voice.

### TÜV Rheinland Certified

TOZO's high-performance noise canceling earbuds certified by TÜV Rheinland. Active Noise Cancellation (ANC) brings you an immersive experience with a noise reduction depth of 42dB.

#### FEATURES

**[Hybrid Dynamic Driver & Balanced Armature Driver]** The TOZO Golden X1 combines customized Balanced Armature and 12mm Dynamic Drivers into a single earbud body, producing harmonized treble and bass for the ultimate sound quality. With Origx and Hi-Res Audio Wireless high-quality sound technology, the TOZO Golden X1 Bluetooth headphones meet the requirements of even the most demanding audiophiles.

**[Balanced Armature Driver & Hi-Res Audio]** Featured with Hi-Res Audio, X1 is much more excellent in treble handling. Capable of reproducing treble up to 44.1kHz, which is higher than the 20kHz that humans can hear. It can even restore the ultrasonic sound of dolphins. The Balanced Armature Driver can excellently reproduce high-frequency sounds such as guitar metal, treble cymbal for drums, etc. Immerse yourself in the world of music.

**[Hybrid Dynamic Driver System]** TOZO Golden X1 headphones combine customized 12mm dynamic drivers into a single earbud body, which is capable of delivering 12Hz bass, even below the 20Hz that humans can hear. It can restore the earth's trembling subwoofer vividly, producing harmonized bass for ultimate sound quality.

**[LDAC HD Audio-decoding]** TOZO Golden X1 is equipped with LDAC technology, which can stream 24bit/96khz music (also known as high-resolution audio music) via Bluetooth at speeds up to 990 kbit/s, which can transmit data more than 3 times compared to the ordinary Bluetooth SBC.

**[OrigX Pro High Quality Sound]** The high-tech TOZO Golden X1 headphones support OrigX Pro high-quality sound technology, which is a wide frequency technology that supports 12Hz to 44.1kHz, perfectly shows the sound aesthetics, not only that, TOZO Golden X1 headphones also pass the JAS (Japan Audio Association) Hi-Res (High-Resolution Audio) wireless certification for excellent quality.

**[Environment And Active Noise Cancellation]** The active anti-noise mechanism allows people to enjoy music without raising the volume too much, or just to use the noise reduction function without music to help passengers fall asleep on planes or trains. 6 built-in microphones, designed with Environment noise reduction technology, can block 90% of background noise, thereby reducing ambient noise by up to 42dB, Noise reduction highlights the call effect.

**[Charging Compatibility & LED Digital Display]** Compatible with Type-C and wireless charging, it provides multiple choices, making charging worry-free and simple. It is also equipped with a digital LED smart display that can let you know the headphone battery in real-time.

### FEATURES

**[Active Noise Cancellation]** Hybrid 3 layer Active Noise Cancellation. 1. Outward-facing microphone detects external sounds and counter with equal anti-noise to first cancel noise. 2. Inward-facing microphone listens inside ear canal to pick up internal sounds and produce anti-noise again to twice cancel the left noise. 3. Ear caps prevent 90% noise going to ear canal.

**[Transparency Mode]** With the transparency mode, you can hear what you want to hear, which lets outside sound in so you can hear and interact with the world around you. You can clearly hear the announcement of the airline or subway and what is saying around you without taking off the headphones.

**[Optical Sensor Technology]** The earbuds utilize optical sensor technology, which allows them to automatically pause playback when removed from your ears. They also feature high-precision touch sensors that have been optimized for everyday use and active lifestyles, continuously detecting their wear status in real-time.

**[Professional ORIGX 2.0 Technology]** The professional ORIGX 2.0 technology further optimize the performance of vocals and mid-range, delivering more distinctive immersive and realistic sound through clear layers and extremely rich vocal music details.

**[Support TOZO APP]** TOZO APP offers quick and easy access to Active Noise Cancellation mode and EQ mode switch, as well as the ability to save noise reduction intensity customized adjustment and EQ curve settings. It can be used to customize Gesture operations and perform OTA software updates on the product. Where you can become acquainted clearly with the Quick Guide and Product FAQ.

**[Built-in Dual Noise Cancelling Microphone]** Double microphone noise reduction system suppresses environmental noise. A dedicated internal and two external microphones pick up your voice and isolate it from outside noise.
