

## Mini-WM15-2 Air Purifier

This product is manufactured using Needle Point Bi-Polar Ionization technology developed by IAIRE. The ionization module produces millions of +/- ions that replicate those commonly found in nature. The ions neutralize pathogens by robbing them of life-sustaining hydrogen and help keep the air in the space fresh, crisp and odor free. Additionally, they kill bacteria, mildew, mold, fungus, and neutralize viruses, including SARS-CoV-2. Needle Point Bi-Polar Ionization technology meets the UL 2998 Ozone-Free standard, so it is safe to operate continuously in occupied spaces.

**Specifications:** Housing – Recycled Polyethene encloser

Size – 11” W X 2.94” D X 6.25” H

Power – 115V / 1Ph / 60Hz

Air Volume – 88 CFM

Speed - 2700 RPM

Filter – None

Purification – Needle Point Bi-Polar Ionization

Warranty – 1-year limited warranty (877) 624-3247

**Operation:** Mount unit on wall with plenty of room to allow adequate air to circulate around the unit. Keep unit away from water and plug cord into an appropriate outlet. Ion unit light inside of unit should be lit green when unit is switched on and fan is running.

**Maintenance:** Unplug unit before performing any cleaning. Ion unit installed internally needs to have the brushes cleaned by air blast or with provided brush as they become dirty.

**Anchor Installation Instructions:** Unit can be mounted Vertical or Horizontal with two 8” C-to-C holes

Drill ¼” holes into drywall/wallboard, brick or concrete. Insert (supplied) anchors into the holes. Insert screws into anchor and screw clockwise leaving approximately ¼” from wall for key slot unit mount. Adjust screws in or out as needed for secure fit to wall.

**CAUTION:** ALWAYS WEAR SAFETY GLASSES.
