Archey Wheel Stop

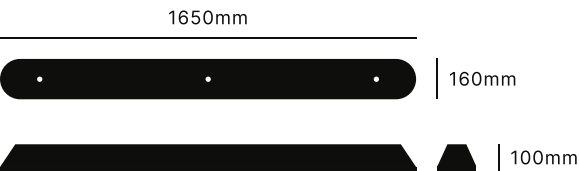

An essential for any new commercial or private carpark, the Archey wheel stop is a softer, more subtle take on an old classic. Made from 100% recycled plastic, Archey is available with or without reflectors.

- Compliant with Australian and New Zealand certification standards
- Superior durability with added ribbing to prevent warps, cracks, chips or rot
- Higher-grip texture and patterning for improved pedestrian safety
- Strategically positioned high-visibility panels to avoid tyre contact
- A softer, more subtle take on a historically bulky, hard-lined design.
- Provision for signage or nameplate
- Resistant to UV, moisture, oil and extreme weather
- Lightweight and easy to install

Main Product	
Code	WS1650V1
Material	Recycled plastic
Dimensions	1650×100×160mm
Weight	15kg
Warranty	3 years

Bolt Fastening	
Code	DYNABOLT16
Material	Zinc yellow
Dimensions	145×16mm
Suitable for	Concrete

Spike Fastening	
Code	ROADSPIKE300/300G
Material	Electro/Spun galvanised
Dimensions	300×12mm
Suitable for	Asphalt/bitumen

Why wheel stops?

Wheel stops are specifically designed to delineate available parking areas and inhibit encroachment into opposing parking spaces, pedestrian areas or hazardous driving areas.

Without traffic safety solutions like wheel stops, people are at risk of injury, property and vehicles are at risk of being damaged, and you as the owner may be liable for any incidents that occur.

Common use-cases include:

- Airports
- Hotels
- Hospitals
- Stadiums
- Schools
- Shopping centres
- Municipal car parks
- Train stations
- Public parking

About us

As natives of New Zealand, Tim and Rowan were always well versed in the ingenuity of everyday kiwis. Inherently curious, they began asking themselves why the traffic safety industry hadn't seen any real change in decades. And with that spirit of wonder, the Tisdoo journey began.

After months of researching and tinkering, Tim and Rowan teamed up with Josh, an industrial designer and user-experience expert. Together, they crafted their first product - a wheelstop. The outcome? An entirely new take on an old favourite, and an ongoing mantra to create better things in a better way.

SIMPLE

No flashy logos. No senseless details. Just the best traffic safety products, made for durability and designed practically. It's that simple.

SAFE

All of our products are up-to-snuff with Australian and New Zealand safety standards, minimising your risks and protecting your customers.

REIMAGINED

Traffic safety design hasn't changed in forever. We're here to mix things up. Highly functional, classy products that don't feel like an afterthought.
