

CHLORINE DIOXIDE FOR BREWERY AND WINERY APPLICATIONS

Keeping your operation free of germs and bacteria is no easy feat. Let us help with that.

EFFECTIVE

Our ultra-pure ClO₂ improves shelf life, destroys taste-distorting microbes, and prevents spoilage microbes from multiplying.

SAFE

Experience a product that is ultra-pure, non-corrosive, organic, and non-residual.

CERTIFIED AND REGISTERED

Selectrocide® is approved by the FDA and registered with the EPA.

ABOUT US!

SMT's Selectrocide® product disinfects a variety of brewery surfaces, including stainless steel, fluid lines, tanks, cans, bottles, and wood. Our stabilized chlorine dioxide formula eliminates germs, molds, and viruses without leaving behind chemical residue, ensuring your brew maintains its unique, flavorful taste.

SMT's pure chlorine dioxide solution is a safe, organic alternative to conventional sanitizing products. It is extremely effective at low concentrations and carries the lowest toxicity profile possible.

Selectrocide® is a guaranteed 99% pure chlorine dioxide solution which retains its antimicrobial properties far longer than "stabilized" chlorine dioxide. Selectrocide® is ideal for sanitizing fermentation tanks or draft lines after a cleansing rinse.

CLO₂ IN BREWING

2X As Effective as Iodophors.

5X As Effective As Acidified Sodium Chlorite.

45x As Effective as Peracetic Acid.
