

FAST RELEASE

DEODORIZER
AIR PURIFIER

Easy-to-use kits and solutions.

SMT FAST RELEASE

ABOUT THE PRODUCT

Our Fast Release product utilizes cutting edge Ultra-Pure ClO_2 technology to deodorize and purify air in homes, offices, warehouses, and more.

OFF GAS DEODORIZER

- True dry gas fumigation that will deeply deodorize any space or environment.
- Primarily used to eliminate microbial threats prior to starting a new grow.
- This includes hard to reach places such as microscopic openings on non-sealed materials, HVAC ducting, electrical components, and much more.
- Due to the very small size of the chlorine dioxide molecule, it can easily penetrate into all of these spaces to eradicate the source of volatile organic compounds, odors, and other compounds from deep within.
- Designed to eliminate odors (not cover them up with scent or fragrance).
- Neutralizes smoke from all porous and non-porous surfaces.
- Comes with its own generation container.

Contents

Our products utilize our patented micro-reactor technology meaning only the most pure ClO_2 will be emitted into homes.

Use

1. Remove sachet from pouch.
2. Add water.
3. Wait 30 minutes for solution to activate.
4. Let sit for a minimum treatment time of 4 hours.
5. Discard excess liquid down any drain. Sachet is landfill friendly.

Size

1K (1,000 ft ³)	2.5K (2,500 ft ³)
4K (4,000 ft ³)	10K (10,000 ft ³)

ABOUT SMT

SMT's patented ClO_2 formula is a reliable, environmentally-aware alternative to conventional antimicrobial and cleaning solutions. By selectively targeting bacteria at a molecular level, ClO_2 effectively destroys microbial life without destroying equipment. It is extremely effective at low concentrations and does not leave residual chemicals.
