

Elevate Food and Beverage Safety with

SELECTROCID®

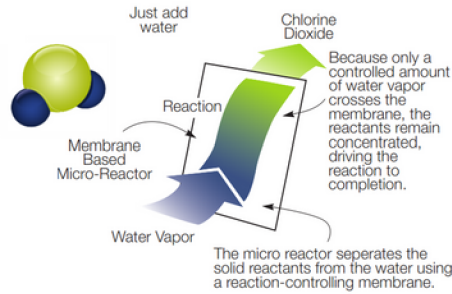

DISINFECTANT/SANITIZER/TUBERCULOCID/
VIRUCIDE*/FUNGICIDE/ALGAECIDE/
SLIMICIDE/DEODORIZER

ULTRA-PURE CHLORINE DIOXIDE

Harnessing the power of our patented micro-reactor technology, only the most pure ClO₂ will be emitted. Our cutting edge Ultra-Pure ClO₂ technology can disinfect and deodorize any environment safely. It is not only an incredibly effective anti-microbial solution but is one of the safest chemicals available on the planet.

HOW OUR MICRO-REACTOR TECHNOLOGY WORKS:

***FOR BEST RESULTS, USE IT WITH THE EXTENDED-RELEASE DEODORIZER.**

REGISTERED

- EPA registered and tested
- FDA approved

CERTIFIED

- National Science Foundation (NSF)
- Organic Materials Review Institute (OMRI)
- California Certified Organic Farmers
- American Mushroom Institute

ABOUT THE PRODUCT

- Water activated.
- 200 times more powerful than bleach, peroxide, and ammonia.
- Safe on skin and materials.
- Controls odor-causing bacteria, mold, and mildew.
- Fast and effective- works in minutes.
- Kills 99.9999% of bacteria, viruses, and spore-formers.
- Leaves no residue to irritate skin, eyes, and nose.
- Easily generates chlorine dioxide at point of use.
- Requires no special training or handling.

FOOD SAFETY APPLICATIONS

- Food Contact Notification No. 1804
 - Antimicrobial agent for wash water for fruits and vegetables including raw agricultural commodities
- Food Contact Notification No. 1764
 - Antimicrobial agent for the fumigation of fruits and vegetables including raw agricultural commodities.
- Food Contact Notification No. 645
 - Antimicrobial agent for poultry processing, including processing water, spray or dip.
- Food Contact Notification No. 1578
 - Antimicrobial agent for red meat processing including meat parts, organs, formed meats
 - Antimicrobial agent for seafood including processing water and ice.
- NSF ANSI/60 and 61
 - Approved for drinking water treatment and potable water systems.
- EPA 74986-5
 - Antimicrobial agent for washing fruits and vegetables including raw agricultural commodities.

ABOUT US

We specialize in the production and application of cutting-edge chlorine dioxide solutions, serving a wide array of sectors, from clinical diagnostics to agricultural practices. Our products are versatile, capable of disinfecting, sanitizing, or deodorizing virtually any environment.
