DEODORIZER

Easy-to-use and implement
disinfection kits and solutions.

SELECTROCIDE 12G KIT

ABOUT THE PRODUCT

SMT disinfection kits can be used to generate Selectroicide® products directly to hospital grade disinfection concentration. Just add appropriate volumes of water, add sachet, and allow generation.

SELECTROCIDE® 5G KIT

ADDITIONAL INFO

Registered

SMT's Products are EPA registered disinfectants proven to kill Coronavirus.

Kit Contents

Each kit contains a case of Selectroicide®, dilution tank, ClO₂ test strips, and spray bottles.

Use

1. Add Selectroicide® sachet to the tank.
2. Fill with appropriate amount of water.
3. Allow two hours for generation.
4. Once generation is complete, use spigot to fill spray bottles.
5. Use test strips to verify concentration of 100 PPM.
6. Spray on surfaces and ensure correct contact times.

SELECTROCIDE® 1G KIT

ABOUT SMT

SMT's patented ClO₂ formula is a reliable, environmentally-aware alternative to conventional antimicrobial and cleaning solutions. By selectively targeting bacteria at a molecular level, ClO₂ effectively destroys microbial life without destroying equipment. It is extremely effective at low concentrations and does not leave residual chemicals.
