

Products: Smoke Extractor Actuator
Serial Range: N/A
Release Date: May 30, 2023

Smoke Extractor Actuator

The current smoke extractor actuator for single-damper smoke extractors (571003) has been discontinued by the manufacturer. It will be replaced with a similar actuator from the same manufacturer. The new actuator (571017) is slightly larger and will require a new mounting strap. The new mounting strap (570015) attaches to the mounting bracket using the existing holes. The third mounting hole for the actuator is in a different location. A new hole can be drilled in the existing bracket, or a new bracket (573029) can be purchased. The same conduit connections and adaptors are used.
