

### Pet Insert Installation

Installing the ZÜCA insert in the ZÜCA frame is easy. First, take the insert and open the main front zipper. Reach inside and form the insert into the shape of the frame. Next, **remove the back of the fabric fastener**, but don't remove the wax paper just yet.

Locate the floor panel and snap on an absorbent disposable pet liner to the bottom snaps. From the main opening, place the pet floor panel inside the insert, with the snaps facing down. You're almost done. Just one more step...

Turn the frame upside down and look under the seat between the telescoping handle and the round grip hole. There are two spaces where you will adhere the fabric fastener strips you set aside earlier. Now with the wax paper removed, **affix the fabric fasteners to the underside of the seat, as shown.**

Finally, adhere the fabric fastener at the top of the insert to the fabric fastener you placed under the seat. Make any last needed adjustments so that your insert sits smoothly in its frame.

Next, **place the insert** into the main opening of the frame. Unzip the zipper tubes located on both sides of the main opening to zip them around the front metal tubes. Be sure to start the zipper on the straight section of the front metal tubing; it is easier to get started here than on the curved section. Also, be sure the zipper is mated completely before you start zipping. Zip down both zippers a short distance, then slide insert into place over the curved section of the metal tubes and finish zipping. **Fold over both ends with the protective fabricfastener tabs** located at the top and the bottom of each zipper tube. Locate fabric fastener tabs that hold the insert to the back of the frame and fasten them.

### Care

ZÜCAs are hand washable. Close all fabric fastener tabs and hand wash your ZÜCA insert in cold water with mild soap. Rinse well and hang dry or you may also dry in its frame.

### Warning

DESIGNED FOR PETS UP TO 15 LBS.  
 NOT DESIGNED FOR AIR TRAVEL.  
 DO NOT LEAVE YOUR PET UNATTENDED IN THE CARRIER.  
 DO NOT LEAVE THE LEASH ATTACHED TO YOUR PET UNATTENDED.  
 ATTACH THE LEASH TO THE HARNESS, AND NOT THE COLLAR.  
 REMOVE THE LEASH WHEN TRANSPORTING YOUR PET AT ALL TIMES.

THE PET CARRIER IS DESIGNED TO HOLD A NORMAL SITTING LOAD OF UP TO 300 LBS PROVIDED YOUR ZÜCA IS ON A FIRM LEVEL SURFACE.
