ABOUT US

We specialize in high quality tumblers and all kinds of drinkware. All of our tumblers are double wall 304 Stainless Steel inside and out. Each cup comes with a stainless steel metal straw and a silicone nonslip bottom. With every case pack you receive a variety of designs. We offer assorted cases in order to give more variety to our customers shelves. All tumblers can be customized with custom logos as well as name drops.

PAD PRINTING

Pad printing technique works on an air pressure system to move a specific pad back and forth in order to pick up ink and stamp on the cups.

In order to deliver high quality prints, we use special stainless steel and plastic premium ink.

We offer Gold, Silver, Black and White color ink options to all of our customers.

Custom logos and name drops can be printed on all of our cups by creating a special etched polymer plate. The maximum size for each logo is 2 inches x 2.6 inches due to the cups curvature. After the cups are printed, they are displayed to dry for 24 hours in a controlled temperature before packing them into boxes for delivery.

ENGRAVING

We use a CO2 Laser engraving machine that specializes in etching on Premium Stainless Steel materials. Using this technique, we are able to deliver high quality logos giving the cup a more elegant and luxurious look and feel. All custom logos and name drops can be maximized on the cups printing surface.
