JANOME

1600P-QC Features

Maximum speed 1,600spm (minimum 60spm)	Bobbin winding diagram printed on machine top	Thread diagram printed on machine front
Independent bobbin winder system	Memorised needle up/down	Synchronised thread tension lever
Adjustable knee lift	Extra large 225mm x 140 mm arm space	Variable stitch length up to 6mm
Pressure indicator window	Dual lights	Sleek design of home machine
Auto thread cutter	Industrial-type thread take-up lever	Quiet operation with no external motor
Variable speed control	No oil holes on bed	Optional extension table available
Built-in needle threader	Sealed bearings on shafts	Darning foot and darning plate included
HL needle	Up to 11 lbs. of presser foot pressure	Auto thread trimmer switch included
Side-loading, industrial rotary hook	Industrial pre-tension threading	Dust cover

Ever True Stitch Length

Ensures the truest stitch quality regardless of sewing speed. Also allows easy transition between different layers of fabric.

Smooth Feeding Thread and Diagram

The 1600P-QC has a pre-tension thread regulator that takes the kinks out of your thread even before it goes through the tension mechanism.

Side-Loading, Industrial Rotary Hook

Consistent stitching with industrial quality. Side-loading bobbin also allows for easy access even when on a quilting frame.

More Pressure

The 1600P-QC provides up to 11lbs of pressure from the presser foot. That's the highest pressure available on the market today for a home straight stitch machine. Power through even the thickest layers of fabric without shifting.

Knee Lift

Give yourself an extra hand with the 1600P-QC's knee lift. The knee lift lets you raise and lower the presser foot without taking your hands off your work. Quilters love this feature.

Memorised Up/Down Needle Setting

The exclusive Up/Down needle button lets you control the needle's position at the end of the stitch. Set it for UP when you want to move your fabric; DOWN for corners and pivots.
