ET.CYCLE

Powered By **Das-Kit**

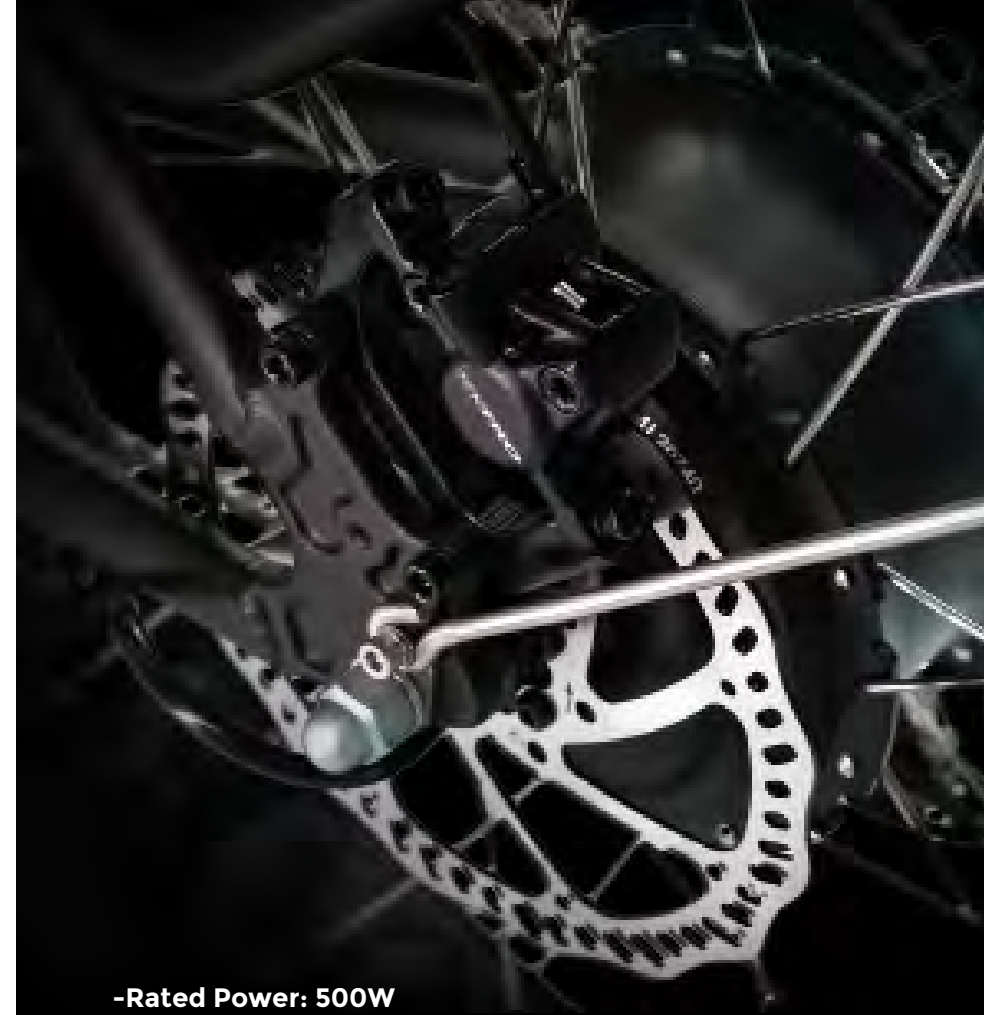

The Das-Kit X15F motor is long lasting, efficient, and powerful. Combined with the sleek, fully-integrated yet large capacity battery, our ET.Cycle bikes give you the ultimate feeling of freedom. Ride further, faster, without breaking a sweat.

WHAT IT MEANS TO BE POWERED BY DAS-KIT

The patented design of the **I5/I6** and **T6/T7** controllers allows for easy cable management that runs through the bike's frame. Without the jumble of cables like other e-bike controllers, Das-Kit keeps you stress free with this low-maintenance design.

Powered By **Das-Kit**

-Rated Power: 500W
-Voltage: 48 V
-Torque Rating: 70Nm
-Weight: 3.2kg

At 500 Watts with a peak wattage topping off at 500 Watts, the Das-Kit hub motor not only offers powerful torque but with its German designed efficiency it does all this weighing no more than 3.2kg.

-720 models : 48V 15Ah, 720WH
-1000 models: 48V 21Ah, 1008WH

Combined with a powerful motor, the Das-Kit's battery really stands out and makes ET.Cycle bikes stand out in the vast sea of electric bicycles. With lab tested ranges of up to 200km, even in real world conditions you will never worry about having enough power to make the trip back home.

ABOUT US

MAKE YOUR OWN RULES

At ET, we've taken the spirit of American motorcycles and put it into the heart of our fat tire electric bikes. Our goal is freedom across all terrains-city, sand, trail, snow. We've engineered strong frames and powerful drive systems and motors to open up the city and the country to your imagination. Give your attitude an extra charge.

THE SPIRIT OF AMERICAN MOTORCYCLES

DEVELOPING FAT-TIRE EBIKES SINCE 2014

ET is the rebellious child in our family of ebikes, full of energy and the passion to explore the great outdoors. Founded in 2014 in Hanover, Germany, ET took a decade's worth of R&D expertise, innovation, technology and did what others at headquarters would not dare to do - we made amazing fat tire ebikes out of it. With longer battery life, better built frames, and after-sales service surpassing the competition, ET is here to stay.

DIRECT TO YOU

ET controls its vertical supply chain, therefore we can offer the highest quality bikes and components to you without the additional retail costs of many electric bike brands. We oversee our own R&D, procurement, manufacturing and sales - meaning we can deliver better designs, stronger components at a faster rate and provide the most competitive prices to our consumers. It's not easy. But it's smarter. Our frames, electronic components and motors are produced in our own production facilities to the highest German standards.

T720 Electric Fat Tire Bike

Our T720 electric fat tire bike is designed to let you cruise safely down the road with an air of authority. Built with utility and style in mind, the front and rear luggage racks are perfect for those planning to go on long-distance rides or those that want to take their pets with them for a weekend excursion. Sand, snow, rugged trails, and rough city streets, the T-series handles terrain most e-bikes would find unforgiving.
