THE RAFAEL BY EXPOBAR

Where price and reliability are required, you can't go past the newest and latest addition to the Expobar range "The Rafael". With its curvy bright stainless steel body and gloss black sides, it really will make an impression to any cafés front bar!

Expobar have produced a budget priced machine without compromising the design or componentry that they have made their reputation on. The Rafael makes use of all the standard parts you will find in their traditional range so you can now make the most of their successful and reliable design and save along the way.

Available in 2 or 3 group high group configuration with programmable volumetric control, built in pump and motor, traditional copper and brass boiler construction, automatic back flush program, blue illuminated touch pads and dual pressure gauge.

The machines are manufactured by Expobar's skilled and experience craftsman in Gandia, Spain which guarantees extreme reliability and user – friendliness. For those who are budget conscious, this is the model for you!
