

# MODEL 3 Water Heater by Heatworks

Your next whole home, tankless electric water heater. Connected to the Internet of Things.

With twice the power and twice the hot water of our MODEL 2 Water Heater, the MODEL 3 is the world's best whole home, tankless electric water heating solution. The MODEL 3 heats water using graphite electrodes which are used in place of traditional metal heating elements. Through electronic controls, the naturally occurring minerals in your water are excited, producing heat as a byproduct of this process. The only thing that gets hot is the water, which means no scaling or corrosion over time. You'll get purer, endless hot water. And the MODEL 3 will never require any maintenance and has a significantly longer lifespan.

A unique feature of the MODEL 3 is the ability to adjust the current from 30-100 A, depending on your hot water needs. This means, though the unit can be set to draw up to 100 A, it does not have to be set that high. The higher the power setting, the greater the amount of hot water. It can be installed where your existing water heater is or, to get hot water closer to where you want it, it can be installed anywhere there are cold and hot water lines.

The Wi-Fi enabled app will also offer insights to your water and energy usage, and will also accurately allow you to maintain temperature preferences.

### Purer Hot Water

With no heating elements to rust or scale, the hot water that comes from Heatworks' water heaters is the purer than from any other heater in the world.

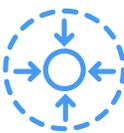

### Unmatched Precision

Through direct energy transfer, water is heated instantly, within (+/-) 1° F of the temperature setpoint.

### Out Performs All Others

It provides instant hot water at any flow rate, is 99% energy efficient and has silent operation.

### Use Anywhere

Waste less water. Unit is very compact to allow for a closer point of use. See up to a 10% water and 40% energy savings each month.

### Worry Free

No annual maintenance required. Comes with an industry-leading 6-year full unit exchange guarantee.

### Wifi Connectivity

Track, control and compare your hot water usage and cost from our groundbreaking mobile app.

## Product Information

Size:	11" x 13.2" x 10"
Weight:	15 lbs.
Connections:	18" flexible water heater connection hoses; 3/4" NPT male connectors
Digital Controls:	LED panel, Full WiFi connectivity & mobile app
Max Temp Rise:	41° F rise at 4 GPM / 82° F rise at 2 GPM
Standard Warranty:	6-year full unit exchange
Main Panel Size:	200 A

## Operating Ranges

Voltage:	208-240 V
Frequency:	50/60 Hz
Power:	6.2-24 kW
Pressure:	30-100 psi / 2.06-6.89 bar / 206-689 kPa
Conductivity:	80-2000 µS
Current:	User selectable from 30-100 A

SKU: HW-0007
