

2 SIMPLE WAYS TO MEASURE YOUR RING SIZE

Print this sheet at 100% or set page scaling to "none".
Make sure this bar below is exactly 6 inches in length.

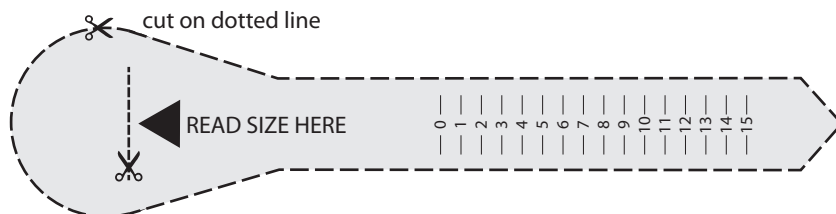

1

Carefully cut out the finger sizer on the dotted lines marked by 2 scissors.

Wrap the sizer around the intended finger and put the pointy end through the slit opening with the numbers facing outwards.

Then pull the sizer tightly around your finger until it is snug. The number aligned at the opening of the slit is your finger size.

2

Use a ring that already fits you.

Place the ring over one of the black circles. Make sure the inner edge of the ring align with the outer edge of the circle with the closest size.
