DESCRIPTION

A unique showcase light that is incredibly compact and versatile by utilizing very efficient spotlights in modules that can be placed as need in the tight rear corners of any display case. Ideal for small showcases with tight design constraints. Modules can be easily removed and placed along any section of the track to accommodate changing lighting demands for product placement changes from day to day. Each of the individual light heads swivel in the vertical and horizontal plane allowing precise focusing of light onto any featured objects.

FEATURES

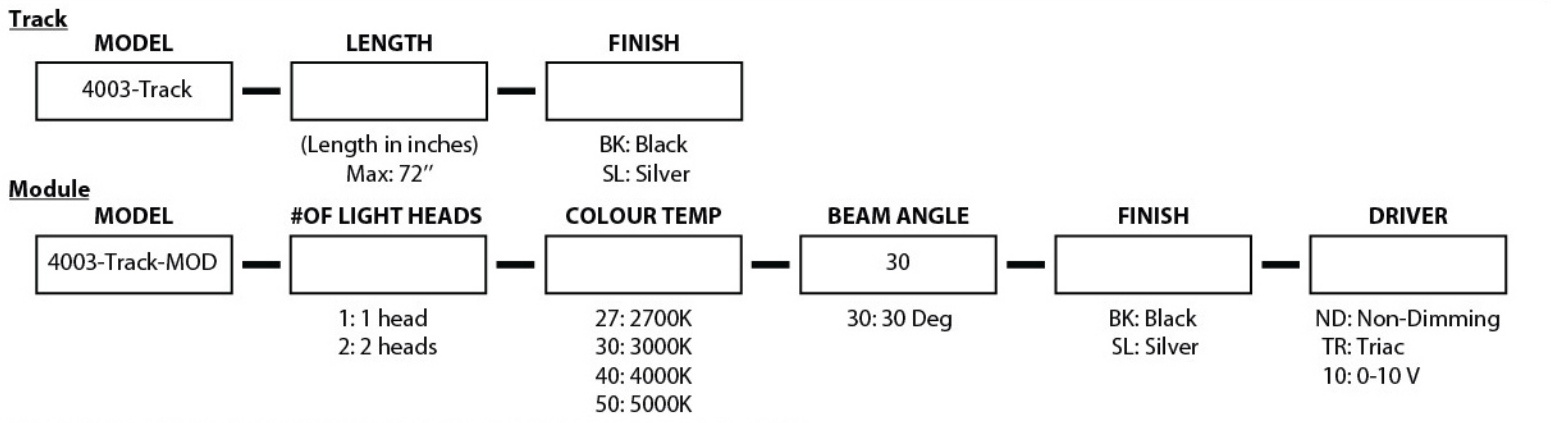

- The system of the wedge light operates on 24 VDC
- Allows removal and placement of modules at any point along the track
- Adjustable light head rotates in the vertical plane and tilts from 0 to 90° in the vertical plane
- One beam angle of 30° is fixed for this unit

* Product specifications subject to change without notice. ►
