

## IMAGE & SIZE

## DESCRIPTION

A modular 24V LED sheet used for back lighting all manner of applications from Fabric displays, back lighting of bar displays, onyx or crystal bars and building back lit walls. Bright at 1100 lumens per square foot the Flexi-Sheets provide a broad expanse of light from 300 LEDs that could be used in so many imaginative ways. The sheets have 8 power input connectors built into the flexible PCB so power can be fed into the sheet from any direction and the connectors allow jumping power from one panel to another to produce a virtually limitless expanse of light.

The back of Flexi Sheet is covered in 3M self adhesive for an aggressive installation to most surfaces.

Flexi Sheet at 12" x 24" can be cut to size or to shape it around obstacles. Cutting the sheets does not affect the circuitry in any way. The cut size is 60mm x 60mm (approximately 2 3/8" x 2 3/8").

## SPECIFICATIONS

Input Voltage	24V DC
Wattage	10 W/Ft <sup>2</sup> , 20 W/Sheet Total
Colour Temp	3000K / 4000K / 5000K
Lumen Output	1100 Lumens/Ft <sup>2</sup>
CRI	>90
Beam Angle	120°
Power Factor	>0.9
Lamp Life	50,000 hours
Environment	IP20
Certification	cULus
Warranty	5 years - see published warranty terms for details

\* Product specifications subject to change without notice.

## FEATURES

- Modular 12" x 24" sheet size
- 300 pieces of 2016 LEDs
- 20W of power
- 90+ CRI
- Three CCT of 3000K, 4000K and 5000K
- Cuttable at 2 3/8" (60mm) squares
- Flexi-Sheet comes complete with jumpers for attachment of other sheets and hardwire power input wire.

## ORDERING INSTRUCTIONS

### MODEL

RL24-SH

### COLOUR TEMP

30: 3000K  
40: 4000K  
50: 5000K

**Example:** RL24-SH-40=RL24, 4000K
