DESCRIPTION

The ultra slim series of linear lights [$9/16''$ (14.25mm) diameter] was designed specifically for retail showcases and glass display cabinets. The slimmest lighting fixture profile on the market today was intended to elegantly replace the bulky fluorescent fixtures commonly found in showcases.

The 90° beam angle flawlessly fills the entire cabinet with even illumination highlighting the product to perfection. The Luna System is a high colour rendering fixture, designed for areas where even linear illumination is a design priority. Used for illuminating showcases in shops, art galleries, hotel lobbies and commercial office spaces. Beam rotates 360° about horizontal axis.

Custom sizes are available; custom length up to 78'' (2m) and height up to 20'' (508mm) in one fixture [with $1/16''$ (1.6mm) increments].
