

K26

HEMEVITE™

Supports Healthy Iron and Red Blood Cell Metabolism

BENEFITS OF PRODUCT

- Provides a rich source of iron compounds necessary for heme synthesis and iron absorption

USE OF PRODUCT

The lack of iron is the most common nutrient deficiency in the United States. Those most vulnerable include teenage girls, the elderly, pregnant women, menstruating women, and infants under the age of two. **HemeVite™** contains ferrous fumarate and a high-quality hydrolyzed liver extract to provide a rich source of iron that does not cause abdominal discomfort. This product also contains ascorbic acid and hydrochloric acid to support the absorption of iron.

OTHER PRODUCTS TO CONSIDER

An additional source of hydrochloric acid, such as **HCLPro-Zyme™ (Z26)**, may need to be taken in conjunction with **HemeVite™** by individuals with decreased HCL output, such as the elderly.

DIRECTIONS

Take 1-2 capsules, 3 times a day, or as directed by your healthcare professional.

Supplement Facts

Serving size 1 capsule

Servings per container 90

	Amount Per Capsule	% DV
Vitamin C (as ascorbic acid)	200 mg	333%
Iron (as ferrous fumarate)	6 mg	33%
