

Pantethine

What Is It?

Pantethine is the active form of the B vitamin pantothenic acid and is a major component of Coenzyme A, or CoA. In cells, CoA is essential for fatty acid transport and fatty acid metabolism. Several human studies demonstrate the ability of pantethine to maintain proper utilization and metabolism of lipids and triglycerides, promoting healthy cardiovascular function.*

Uses For Pantethine

Lipid And Triglyceride Support: In a 16-week trial, pantethine supplementation supported healthy lipid balance in perimenopausal women. A 9-month study involving 16 subjects, a 3-month trial involving 12 male volunteers, and an 8-week double blind investigation including 29 participants revealed the positive influence of pantethine on healthy triglyceride support.*

What Is The Source?

Pantesin™ pantethine is synthetically produced and is a licensed trademark of Daiichi Fine Chemicals, Inc. Hypoallergenic plant fiber in this formula is derived from pine cellulose.

Recommendations

Pure Encapsulations recommends 2–4 capsules per day, in divided doses, with meals.

Are There Any Potential Side Effects Or Precautions?

At this time, there are no known side effects or precautions. If pregnant or lactating, consult your physician before taking this product.

Are There Any Potential Drug Interactions?

At this time, there are no known adverse reactions when taken in conjunction with medications.

Pantethine

each vegetable capsule contains

pantethine..... 250 mg.
(hypo-allergenic plant fiber added to complete capsule volume requirement)
2–4 capsules per day, in divided doses, with meals.
