- No other fees, maintenance, license, software, services or contracts.
- □ Free support, free upgrades.
- □ Free cloud service; manage the Internet from anywhere.
- Branding is easy to customize your Internet service.

Community Internet using Starlink: easy to install and operate

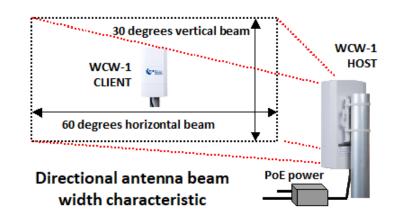

Many rural communities around the world had no hope of getting Internet access until now. The Starlink Internet operates almost everywhere in the world and can be shared with homes in a community when the Internet service is managed using a Guest Internet controller. The unique Guest Internet features maintain good Internet performance for many users while ensuring that Starlink requirements are not exceeded.

Install point to point wireless links from your Starlink antenna to your user with the STAR-3 kit

The STAR-3 kit adds additional wireless links for other STAR kits. The STAR-3 kit has two wireless units that can be configured in three different modes and includes full installation instructions.

Each STAR-3 kit has two WCW-1 outdoor integrated wireless antenna and receiver. The only additional item required is the Ethernet cable that connects the WCW-1 to the power-over-Ethernet (PoE) supply. Guest Internet equipment is very easy to use so it is not necessary to rely on an expert to operate the system, anyone can do it.

The point-to-point (P2P) wireless configuration is illustrated in the figures. The equipment can also be configured as dual clients and as dual hosts.
