

# WAP-3

## Dual-band high-power outdoor wireless access point

Long-range WiFi wireless access point for fixed wireless access (FWA) Internet

### WAP-3 Product Specifications

Standard	IEEE802.11ac
Frequency	2.4GHz + 5.8GHz
Wireless data rate	300+ 900 = 1200 Mb/s
WAN	1 * 10/100/1000Mbps
PoE Power	IEEE 802.3at 48V POE
Lightning Level 1	Common mode: 6KV;
Lightning Level 2	Differential mode 2KV
Antenna 2.4GHz	2*6dBi omni antenna
Antenna 5.8GHz	2*6dBi omni antenna
RF Power	500mW + 6dBi
Water-proof Level	IP65, plastic enclosure
Operation Mode	Wireless bridge
QTY of users	50+

### WAP-3 Product Includes:

Antennas	4*N-type detachable
Power supply	48v PoE power adapter
Ethernet cable	LAN cable, 30cm
Installation	Pole mount bracket

The WAP-3 can be powered by a 48v PoE switch that supports the IEEE 802.3af standard.

### WAP-3 connectors

The WAP-3 is a high-performance product that is robust and very reliable providing up to 1000Mb/s data speed. Self-installation and configuration is easy with simple instructions that are provided in English and Spanish. Power is 48v PoE and a power supply is included.

Applications include community WiFi, campgrounds and RV parks.

The WAP-3 product is an outdoor long-range wireless access point that can provide WiFi Internet access over a large area.

### WiFi wireless Internet for a community

WAP-3 High power long range dual band wireless access point

Power over Ethernet (PoE) switch
