

PEDI MAGIC DEHUMIDIFIER

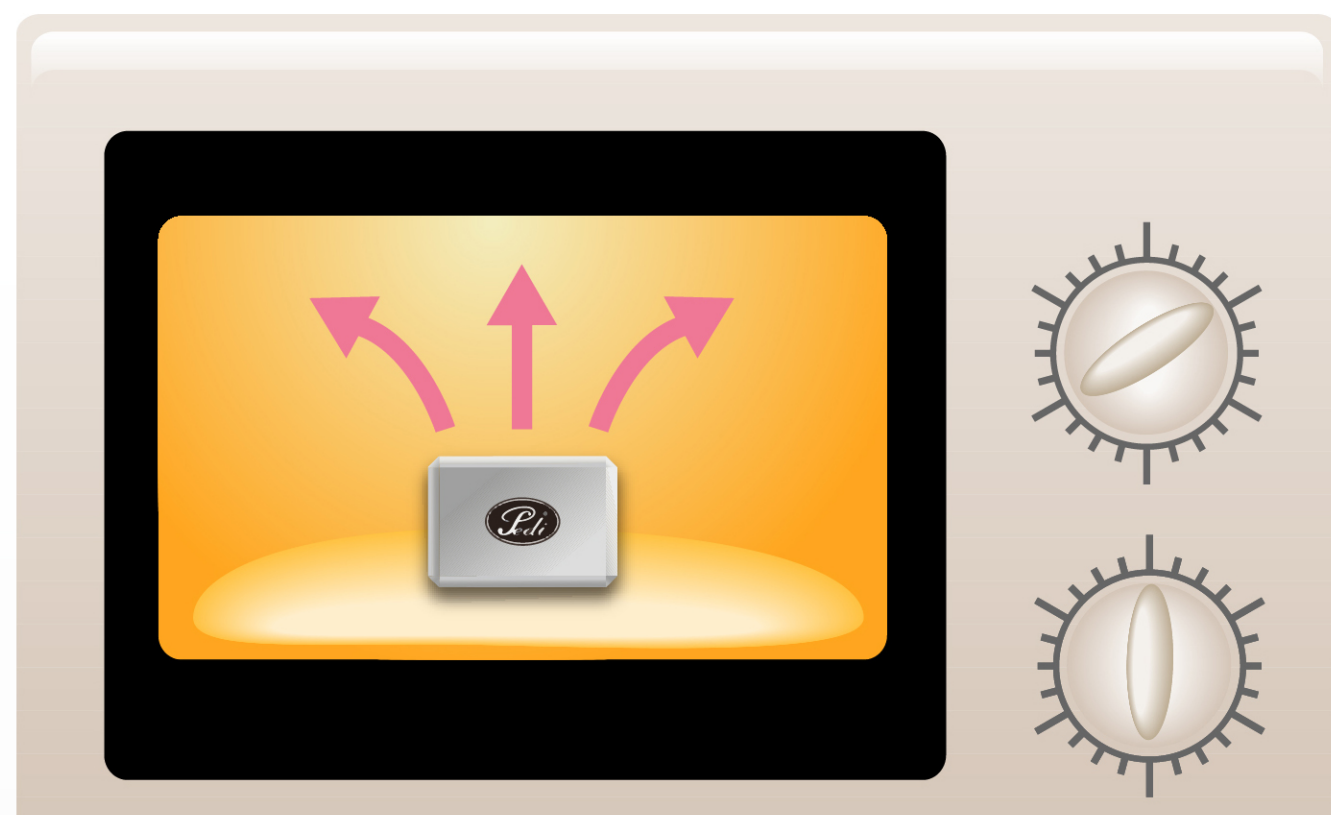

Newly Developed Magic Dehumidifier Dedicated for Musical Instrument Cases.

Maintenance Instructions

Perform maintenance before using the Magic Dehumidifier for the first time.

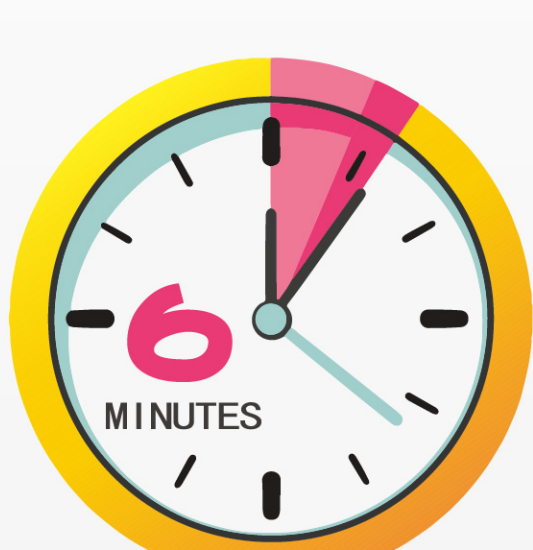

- Microwave Oven in “Defrost Mode”

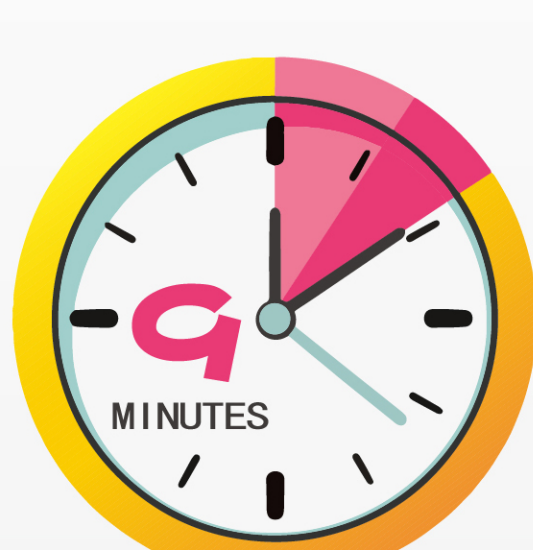

4min

6min

9min

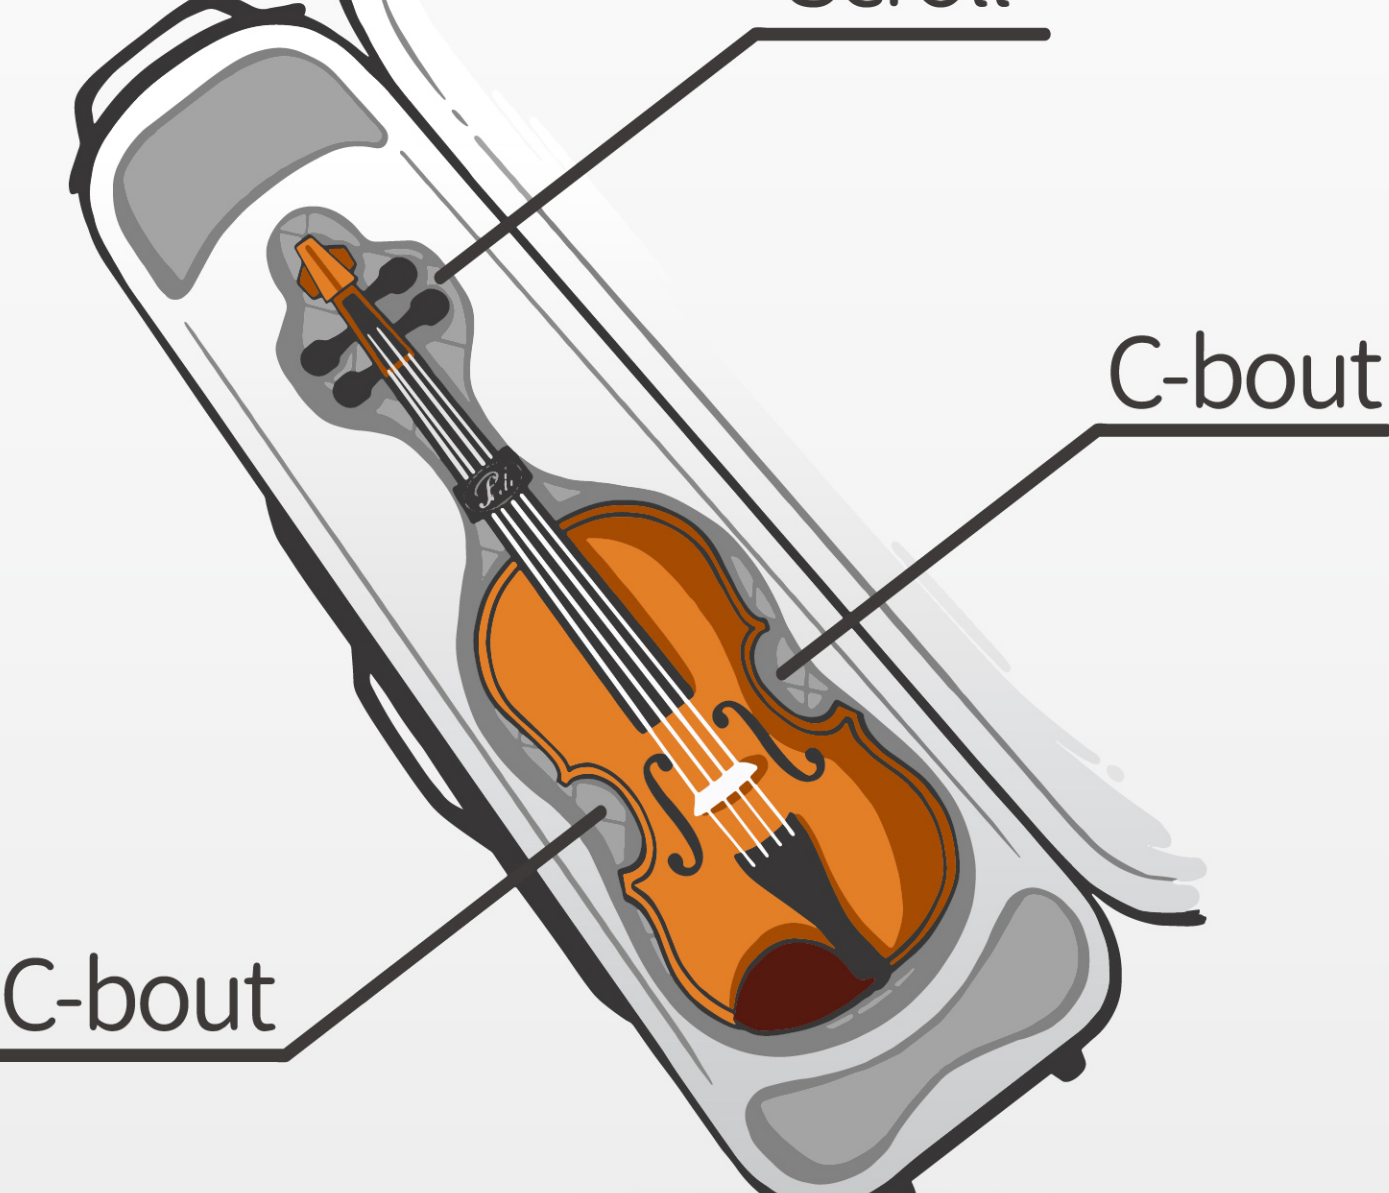

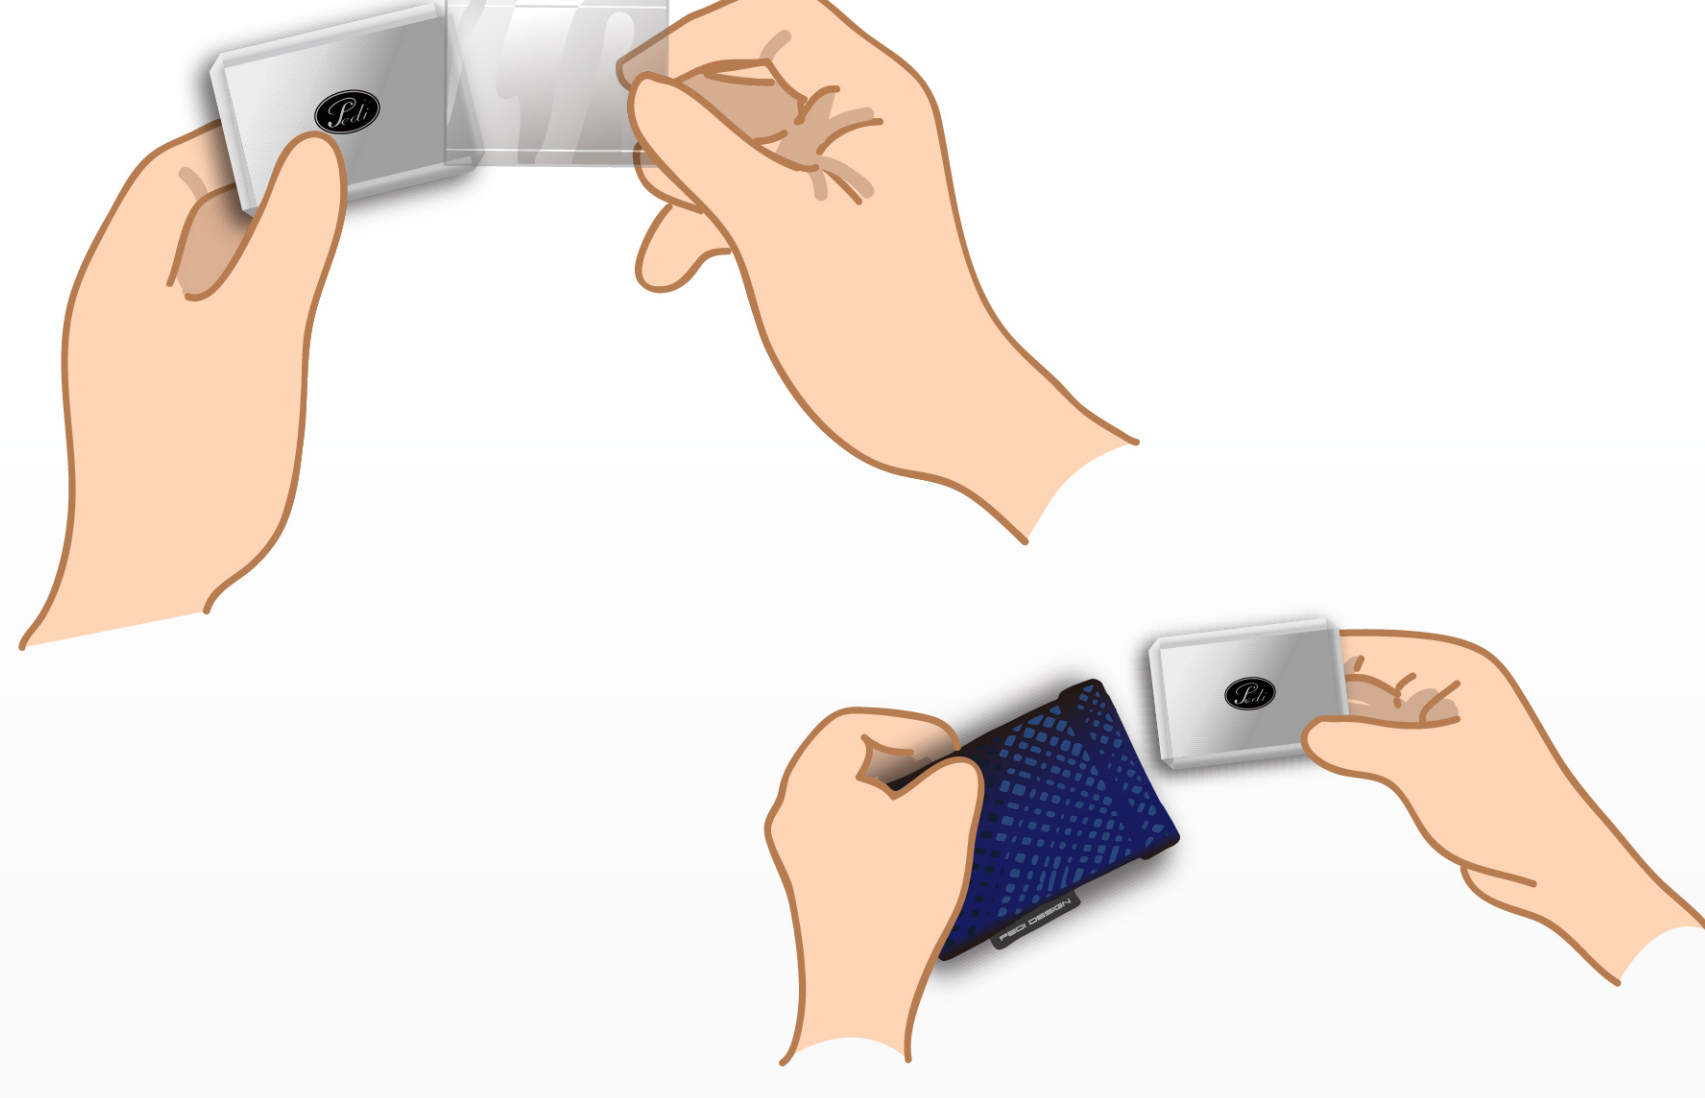

1. Please make sure the microwave is in “defrost mode” before refreshing.
2. Ensure that the microwave is clean inside, do not let the Magic Dehumidifier touch any liquids or dirt.
3. Let the Magic Dehumidifier cool down for 10 minutes before handling them.

PEDI Magic Dehumidifier Usage

- Take the Magic Dehumidifiers out of the plastic bags.

Perform maintenance on the Magic Dehumidifier.

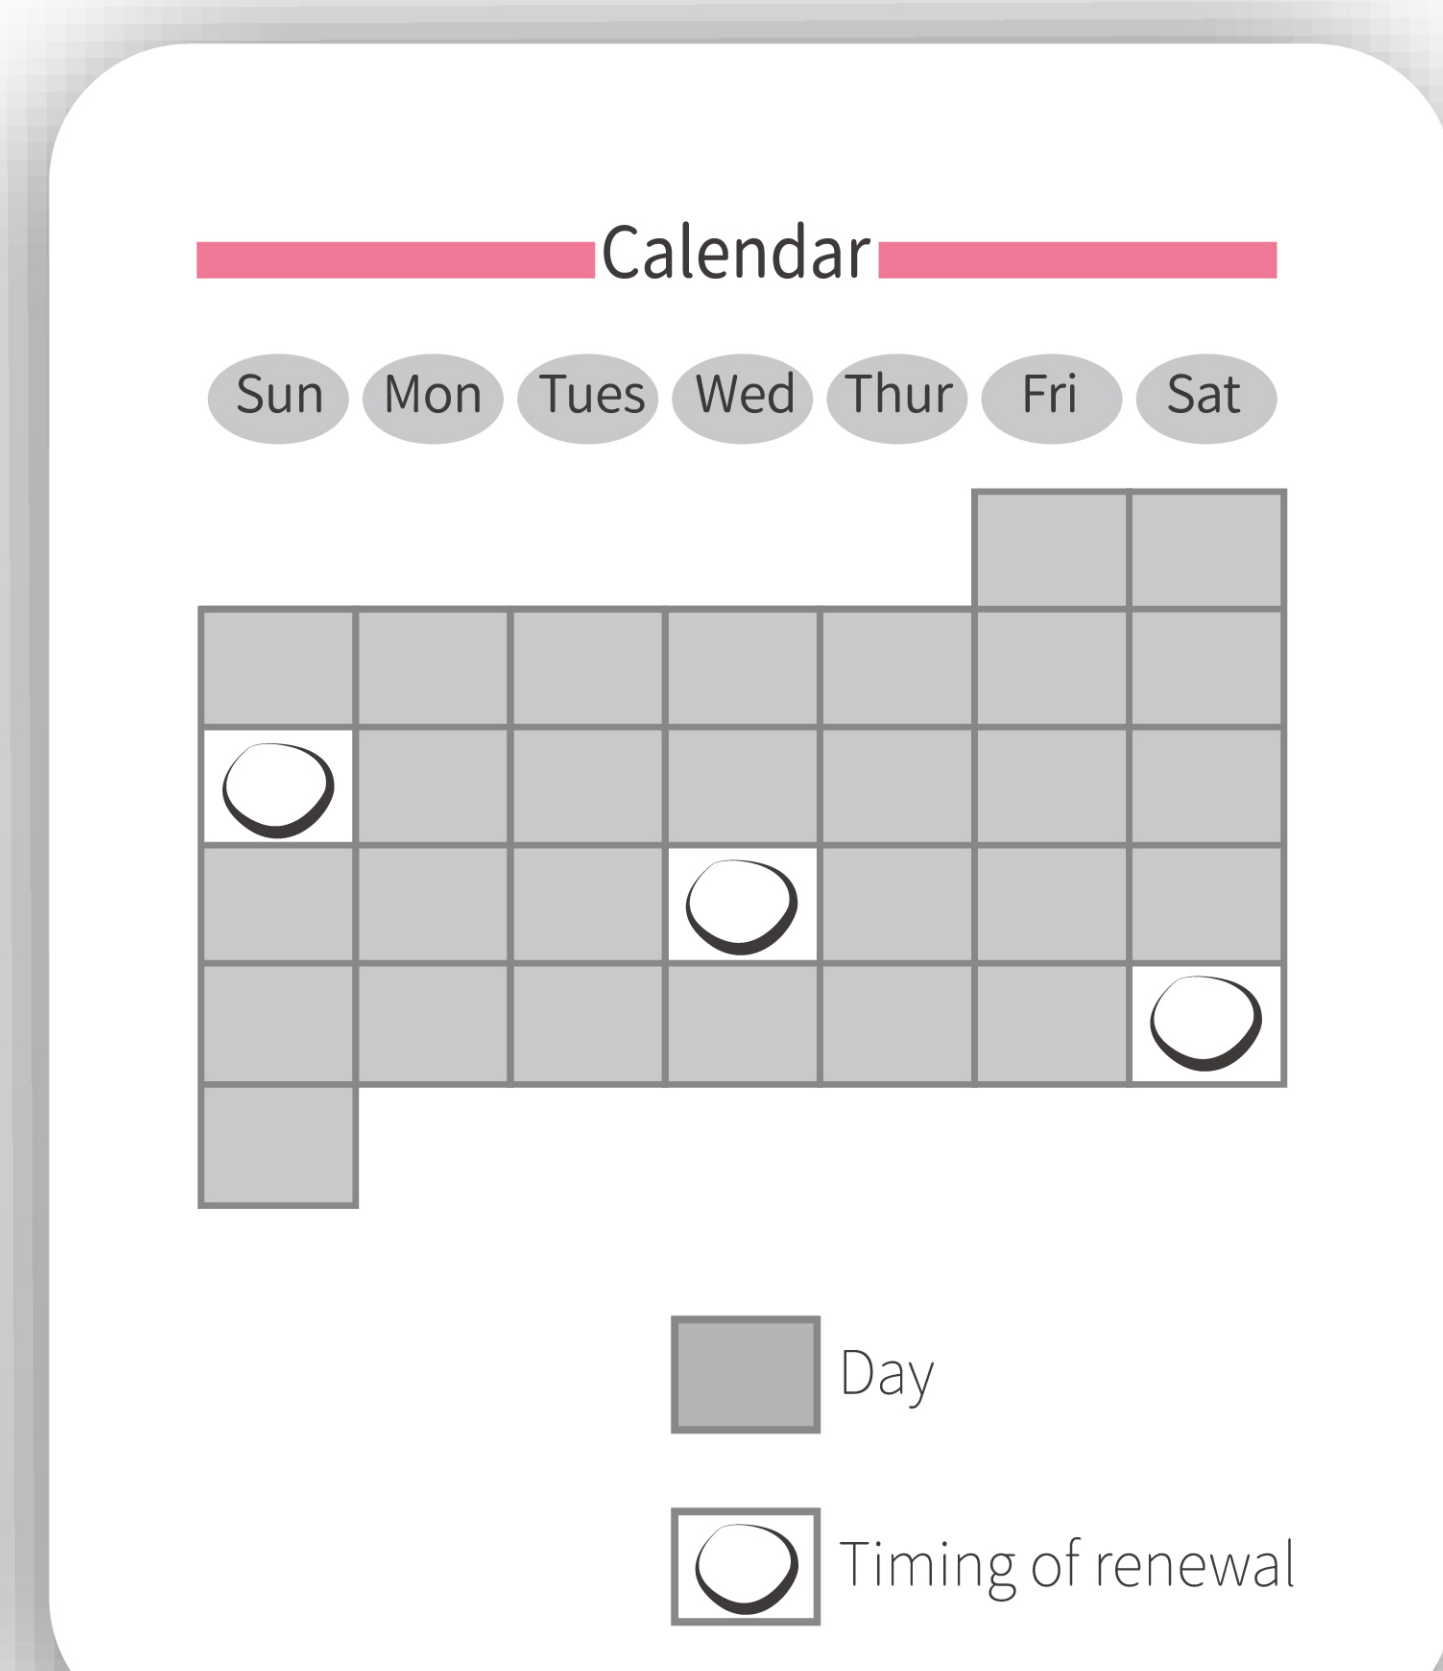

- Place them into their dedicated bags, and into the case as close to the scroll and each C-bout as possible.

Keep your instrument case closed as much as possible to minimize moisture retention in the interior lining.

When is the best time to maintain and refresh?

- **By day**
Once every 7 to 10 days.
(If you frequently open your instrument case)

Once every 15 to 30 days.
(If your case is not frequently opened)

- **By weight**
The net weight of the Magic Dehumidifier is 31g, and it weighs about 38g when it is saturated. You will want to maintain when it is almost saturated.

1. Depending on your climate, you may need to maintain your Magic Dehumidifier more or less often.
2. In order to maintain its performance in optimal condition. Do not refresh the Magic Dehumidifier when it is dry.

How to clean the Magic Dehumidifier

- Please use the clean, dry cloth to clean the Magic Dehumidifier when it is dirty or covered with oil.
