

Wet Wall Panels from WallPanels.com.au

The wet wall panel range from WallPanels.com.au is a commercial-grade product that is designed for use in bathroom, shower and other wet areas. The panels are engineered using PVC and feature a hollow design which keeps them lightweight and easy to handle. The panels are classified as **Group 2 fire-rated wall cladding** adhering to **AS ISO 9705-2003** and **AS 5637.1:2015** standards. The panels feature tongue and groove design which makes them easy to install, at a fraction of the time of tiling.

Product Name	Width	Height	Thickness	Weight	Pieces Per Pack	Warranty
Wet wall panels	2400mm	1000mm	10mm	11kg	1	10 years

Application	Benefits	Certification	Thermal Properties
Suitable for use in bathroom, shower and other wet areas. For indoor use only. Product is wall-cladding, not wall-forming, there must be a wall for installation.	<ul style="list-style-type: none"> ● 100% waterproof ● Easy installation, grout-free ● Simple cleaning and maintenance ● 10 year warranty ● Aesthetically pleasing ● Can fit most spaces 	Group 2 fire-rated wall cladding adhering to AS ISO 9705-2003 and AS 5637.1:2015 standards	PVC panels can withstand surface temperatures of up to 60°C before discoloration or warping.

Accessories	Waterproofness	Storage	Installation
Panels require trim for most installations. Trim may include internal corners, external corners and end caps.	While the panels are waterproof we recommend waterproofing to AS standards (NCC 10.2) in shower areas.	Lay flat until installation in a covered area.	The panels can be installed in new builds or retrofit over tiles, walls, etc. You cannot install directly to studs, there must be a wall there for adhesive to stick to.
