**Transplant Variety** refers to the type of the tree and **Size** is the approximate size of the transplant. Under the age column the first number refers to years as a seedling and the second number indicates the time the tree grew in a transplanted location. Example: 2-2 means 2 years as a seedling and 2 years as a transplant. The longer a tree is in a transplant bed, generally, the larger it is. If you are seeking a variety not listed we may be able to special order it for you.

*Please note – we do not warranty bareroot trees or transplant/seedlings of trees.  
 Prices Effective for Spring 2024*
